Lynchburg, VA 24502
Attention: Pastor Troy Warner

Gentlemen,

As you know, WGFW, Drakes Branch, VA signed on the air in 2011. Our NCE station operates on 88.7 MHz, the same frequency used by your FM translator station W204AZ at Lynchburg.

We've observed that considerable interference is being caused to WGFW in parts of our coverage area, notably in the Appomattox, Virginia area and in several areas along US Highway 460 between Appomattox and Farmville, VA. And no doubt our strong signal is reducing your usable coverage area.

We regret the mutual interference both of us are suffering. We believe it is in the best interest of both stations, and in the public interest, to seek a technical solution for this untenable interference issue. Ideally one of us needs to change channels. WGFW cannot. There are no channels available for our full power station. However, our engineer thinks that you could move to another available channel in the non-reserved band.

Since full service NCE stations have priority over FM translators, we hereby request that you seek to move to another FM radio channel.

We wish you all the best.

Sincerely,

Ralph Rhyme
