

**MINOR CHANGE APPLICATION**  
**WRIGHT BROADCASTING SYSTEMS, INC.**  
**KCDL RADIO STATION**  
**CH 257C3 - 99.3 MHZ - 4.5 KW**  
**CORDELL, OKLAHOMA**  
**June 2006**

**TECHNICAL STATEMENT**

This Technical Statement and attached exhibits were prepared on behalf of Wright Broadcasting Systems, Inc. ("WBS"), licensee of station KCDL, Channel 257C3, Cordell, Oklahoma. WBS herein proposes to make minor changes in the facilities of KCDL by increasing the height of the KCDL antenna, reducing the power, and correcting the coordinates of the station to bring them into agreement with the tower registration.

WBS proposes to locate the antenna system for KCDL on an existing tower at its existing/actual site. During the preparation of this application, it was determined that the existing tower was actually four feet shorter than previously thought. As such, the FAA was apprised of this proposal so that they may update their records. Once the revised determination for the shorter tower is received, the tower registration will be updated with the Commission.

All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to WBS and is available to the Commission upon request.<sup>1</sup>

---

1) It is noted that WBS is also the license of KWEY-FM, Clinton, Oklahoma. An application to make changes/corrections to KWEY-FM is also being submitted. As such, the radio frequency radiation study assumes the proposed KWEY-FM facility in lieu of the licensed facility.
