

Allotment (Question 13)

Results Radio of Sonoma, L.P., licensee of FM Station KRPQ, Rohnert Park, California (Facility Identification No. 55967), by this application, seeks to modify its previous application, FCC File No. BPH-020326AAO, specifying a different transmitting site. The revised site is the same as presently used by its licensed Class A operation.

The “one-step upgrade” allotment site specified in the previous application, in accordance with the provisions of FCC Rules Section 73.202(b), does not change. It is fully-spaced to all other authorized facilities and allotments. Effective July 29, 2002, the Commission Report and Order to Mass Media Docket No. 01-322 ordered the allotment of FM Station KCNL, Channel 285A, Fremont, California, to Channel 285A, Sunnyvale, California. Chase Radio Properties, LLC, the licensee of KCNL, filed an FCC Form 301 application, FCC File No. BPH-20020730AAM, to relocate its transmitting facilities to satisfy the requirements of the changed allotment. The geographic coordinates specified in the KCNL application for its Sunnyvale facilities are fully-spaced to both the KRPQ Class B1 allotment site and to the site proposed in this application.
