In re: WSPY(AM), Geneva, Illinois
Facility Identification Number: 69700
Nelson Multimedia, Inc.
Request for Special Field Test Authority

Dear Mr. Nelson:

This is in reference to your letter dated June 13, 2006, filed on behalf of Nelson Multimedia, Inc. (NMI), licensee of Station WSPY(AM), Geneva, Illinois, seeking special field test authority (SFTA) for operation of a test transmitter on 1480 kHz, employing a temporary tower at geographic coordinates 41° 34' 59" N, 88° 36' 05" W (NAD 1927). For reasons which are discussed herein, the request is denied.

Our review indicates that the proposed test transmitter would cause interference to first adjacent channel Stations WCFJ, 1470 kHz; WPNA, 1490 kHz; and WZOE, 1490 kHz. In addition, due to the level of received interference from these stations, it is unlikely that satisfactory measurement data could be obtained on this frequency if power were reduced sufficiently to eliminate interference caused.

In light of the above, the request for special field test authority IS HEREBY DENIED. The action taken herein does not preclude NMI from seeking a new SFTA on an alternate frequency in compliance with the Commission's technical rules and policies.

Sincerely,

Charles N. Miller, Engineer
