

TOWAIR Determination Results

DETERMINATION Results

Structure does not require registration. There are no airports within 8 kilometers (5 miles) of the coordinates you provided. However, because the airport database we use is updated periodically, it does not take into account the most recent airport construction, nor does it include proposed airports. You still must register with the FCC if your structure is located near one of these airports or if the FAA specifically asks you to register.

Your Specifications

NAD83 Coordinates

Latitude	13-27-29.4 north
Longitude	144-40-28.5 east

Measurements (Meters)

Overall Structure Height (AGL)	28.6
Support Structure Height (AGL)	28.6
Site Elevation (AMSL)	30

Structure Type

TOWER - Free standing or Guyed Structure used for Communications Purposes

[Tower Construction Notification](#)

Notify Tribes and Historic Preservation Officers of your plans to build a tower.

Note: Notification does NOT replace [Section 106 Consultation](#).

CLOSE WINDOW

Proposed Tower Structure is 28.6 meters in height above ground and pass FAA/FCC slope test - no notification to the FAA or FCC tower registration is required.
