Mr. Dan Berman,  
The Main Quad  
1616 Holly Hill Drive  
Durham, N.C., 27713

Dear Mr. Berman:

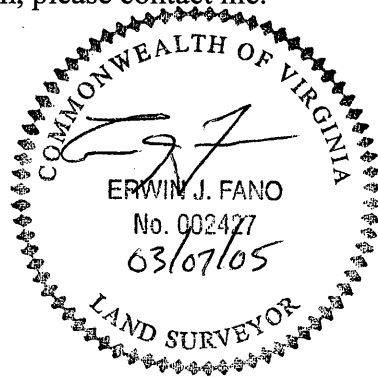

I Erwin J. Fano Land Surveyor, No. 002427, oversaw the determination of the azimuths of three antennas, located on a guyed tower at 23 Sesame St. Richmond VA. 23235. The azimuths of 75, 204, and 320 degrees from true north were determined using G.P.S. ground control set by (Ashtec-model z- surveyor fx 2mb). The tower faces, guy-lines, and center line were located and the proposed azimuths staked radially from the tower.

To check the installed antenna azimuths, the center line of the antennas were physically located from the original G.P.S. ground control using a Topcon Model GPT-8005A. The antennas were found to project at the azimuths of 75, 204, and 320 degrees from true north.

If you have any questions or need additional information, please contact me.

Sincerely,

Erwin J. Fano  
Land Surveyor No. 002427
