Re: KVTA (AM), Port Hueneme, California  
Facility Identification Number: 25091  
Gold Coast Broadcasting, LLC  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed May 16, 2012, on behalf of Gold Coast Broadcasting, LLC ("GCB"). GCB requests further extension of the special temporary authority ("STA") granted on May 20, 2011, and modified on November 21, 2011, to operate Station KVTA with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.<sup>1</sup>

In support of the request, GCB states that it continues to address the damage to its ground system and other problems with its antenna system.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

---

<sup>1</sup> KVTA is licensed for operation on 1520 kHz with 10 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KVTA may continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. GCB must notify the Commission when licensed operation is restored. GCB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 1, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke at the end.

Charles N. Miller, Engineer
