

ESTABLISHED COMMUNITY PRESENCE

Existence of Applicant

The applicant, a non-profit charitable, religious and educational entity, is an Arizona non-profit corporation which was incorporated on July 1, 2008. Our articles of incorporation are included as a separate attachment to this exhibit.

Our offices are located at 1600 East Route 66, Flagstaff, Arizona 86001. The corporation has had a continuous physical presence in Flagstaff since its incorporation; the Catholic Church in Flagstaff dates back to 1886. Currently, the corporation operates: (a) San Francisco de Asís Catholic Church, physically located on East Ponderosa Parkway in Flagstaff, with an assigned street address of 1600 East Route 66, Flagstaff, Arizona 86001; and (b) San Francisco de Asís Catholic School, physically located at 320 North Humphreys Street, Flagstaff, Arizona 86001. The Catholic School has been in existence since 1893, historically known as St. Anthony's, Nativity, and St. Mary's Catholic School; in operation by the applicant at its present location continuously since 1957. The church has moved from a former location in Flagstaff to its new location as of February, 2013.

The school campus is located at approximate NAD27 coordinates 35° 12' 05" north latitude and 111° 38' 55" west longitude. The proposed transmitter and antenna location for our proposed low power FM station would be 1.303 mile from our school

campus, at NAD27 coordinates 35° 12' 8.7" north latitude and 111° 37' 32.2" west longitude.

As we understand Section 73.853 of the FCC's Rules and Regulations, since the applicant's physical school campus has been located within 20 miles of the proposed antenna location for more than the past two years, the applicant qualifies as an "established local applicant" for purposes of the so-called point system.

Additionally, all of the members of its governing board have continuously lived in the Flagstaff area within 20 miles of the proposed antenna location for more than the past two years.

Localism

As noted above, our organization has been in existence in Flagstaff, Arizona since its incorporation by the Arizona Secretary of State on July 1, 2008; at all times it has operated within 20 miles of the proposed transmitter and antenna site.

Additionally, the undersigned has determined that all of the street addresses for the applicant's board of directors are within 20 miles of the proposed antenna location, and each of the directors has lived at his or her respective address for at least the last 24 months.

Therefore, this application qualifies as an "established local applicant" pursuant to Section 73.853(b) of the FCC's Rules.

It is hereby stated under penalty of perjury that the foregoing statements are true and correct.

DATED this 14 day of November, 2013.

Kathy Gimenez
President
