Brookings, OR
Baseline NCE Service Study**

A study has been made of the baseline (i.e. existing) NCE service provided to areas within the 60 dBu contour of the proposed NCE FM facility. Population counts are per the 2000 Census, using the block centroid method. The results of that study indicate that the following existing stations provide protected NCE service to this area, as depicted on the attached map exhibit:

Callsign	Channel	Community
KJKL	204C0	Selma
KSOR	211C	Ashland
KMWR	214A	Brookings
KHSR	220A	Crescent City

The following table lists the population served by the proposed facility, along with the populations which will receive their first and/or second NCE service as a result of the grant of the instant application.

Proposed	Population
60 dBu	14,492
1 st NCE Service	0
2 nd NCE Service	3,414 23.6%

Numerals indicate the number of existing NCE services in areas covered by the proposed 60 dBu contour.
