

Three Angels Broadcasting Network
 Dan Peek—Engineer
 P.O. Box 220
 West Frankfort, Illinois 62896

October 10, 2012

In evaluating the proposed digital flash cut for K08MM FID 57456, an outgoing interference study was executed on the proposed design in the attached application using the OET-69 Longley Rice methodology. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference, there was zero percent interference present found in each case when rounded to the nearest whole percent. Three Angels Broadcasting Network requests that the Commission waive the 10km move rule as the attached application entirely covers the analog 68dBu contour. Attached below is a coverage map showing the original CP coverage and the proposed coverage.

Three Angels Broadcasting Network requests a waiver of international coordination since the 19dBu (50, 10) contour (yellow) does not cross into Mexican territory. The green contours are the analog coverage. The red contour is the proposed digital coverage.
