

## **Further information requested**

Christmas Brick Foundation's educational objective is the dissemination of information relating to the needs of the listening community especially as it relates to the various issues facing the 50+ demographic, (the largest in the region), as well as the need for continual education and learning for area residents at all stages of life.

Christmas Brick Foundation shall promote and further these educational purposes by creating and disseminating broadcast material and public affairs programming addressing these issues as it pertains to Bullhead City and the surrounding communities.

Christmas Brick Foundation will continue KMUR's existing program of working with the Federal government for the training of veterans, and expand the effort to also include individuals recently released from the Federal Bureau of Prisons, under the "Supervised Release" program. KMUR will institute an on-air effort involving announcements and programs to gain training and job placement for these individuals.
