Re: Installation of directional antenna system

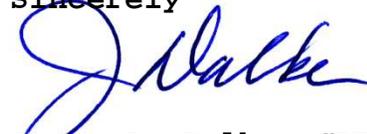

To whom it may concern:

During the period of October 29 to November 15, 2008, I was responsible for the installation of an Electronics Research Inc. model SHP-6AC-DA-HW directional antenna at the KDDS-FM licensed transmitter site located at North 47 deg 18 min 46 sec, West 123 deg 22 min and 15 sec, pursuant to the manufacturers installation instructions. No onsite revisions or alterations were made, either electrically or mechanically.

The antenna orientation was surveyed by Bracy & Thomas, Land Surveyors, and the results of the surveyor have been supplied to Bustos Media of Seattle separately.

I, James A. Dalke have been a broadcast engineer for more than 30 years with experience in transmission facility construction and installation. I am a Senior Member of the Society of Broadcast Engineers, Member No. 16125, and I am certified by the SBE as a Professional Broadcast Engineer.

Sincerely

James A. Dalke, CPBE
