TO WHOM IT MAY CONCERN:

This is to certify that I have reviewed the installation of the directional radio antenna attached to the WMTT radio tower located in the Town of Woodhull, County of Steuben, and State of New York. The tower is situated east of Mead Road and is located S 66°02'E at a distance of 169.6' from NGS horizontal station "WOODHULL USGS 1939". I find the antenna to face at a direction of north 71' east based on true north datum. This direction is accurate to plus or minus 1 degree. The guy wires bear N 11°02' E, S 48°12' E, and S 70°50' W from the center of the tower.
