

EXHIBIT 13

Forum Communications Company (“Forum”), licensee of WDAY(AM), Fargo, North Dakota, hereby notifies the Commission that severe weather on May 30, 2011 destroyed two of the three towers in WDAY (AM)’s nighttime directional array, including the tower from which WDAY(AM) broadcasts during daytime hours (Tower 2).

After extensive efforts, Forum’s engineers have succeeded in returning WDAY(AM) to daytime operation from Tower 1 (ASR No. 1045306) at reduced power. It anticipates that WDAY(AM) will achieve 65% power in the near future. It hopes to restore the station to full power daytime operation thereafter. By this request, Forum seeks Special Temporary Authority (“STA”) pursuant to Section 73.1680(a)(1) of the Commission’s rules to operate WDAY(AM) from Tower 1 of its former 3-tower array.

Forum is currently working to restore WDAY(AM)’s nighttime operations. Also pursuant to Section 73.1680(a)(1), Forum requests STA to operate WDAY(AM) during nighttime hours non-directionally, at no more than 25% of its licensed power level.

In the unlikely event that the STA operations cause objectionable interference, Forum will take all reasonable steps to eliminate such interference.
