**EXHIBIT A**

**Clear Allocation Reference Site**

This application seeks to change the community of license of WVOH-FM from Hazlehurst, Georgia to Nicholls, Georgia. As the proposed implementation site does not meet the minimum distance separation requirements to one other facility, a designated allocation reference site has been identified.

As denoted on Exhibit A1, from the proposed allocation reference site, Channel 228C2 meets the Commission's minimum distance separation requirements to all licensed, proposed or applied for facilities with the exception of the licensed WVOH-FM. From the proposed allocation reference site, a maximum Class C2 would place a theoretical 70 dBu non-terrain impacted signal over 100% of the community of Nicholls, Georgia, as shown on Exhibit A2. Further, as shown on Exhibit A3, the proposed site is not located offshore or on airport property and is, therefore, suitable for tower construction. Therefore, this proposal meets the Commission's allocation criteria.
