Re: KAUU (FM), Manti, Utah  
Facility Identification Number: 59034  
Millcreek Broadcasting, LLC, Debtor in Possession  
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed July 10, 2008, on behalf of Millcreek Broadcasting, LLC, Debtor in Possession ("MB"). MB requests extension of the special temporary authority ("STA") granted on January 11, 2008, to operate Station KAUU with emergency antenna facilities pursuant to Section 73.1680<sup>1</sup>. In support of the request, MB states that has located a new permanent site and that its application for construction permit is pending before the Commission.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted.

---

<sup>1</sup> KAUU is licensed to Manti, Utah, for operation on Channel 286C (105.1 MHz) with effective radiated power ("ERP") of 48 kilowatts (H only) and antenna height above average terrain ("HAAT") of 684 meters. Application BPH-20080325AID proposes relocation of the station to American Fork, relocation of the transmitter, and operation with ERP of 23 kW (H&V) and HAAT of 1203 meters.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KAUU may continue to operate with the following facilities:

Geographic coordinates:	40° 16' 58" N, 111° 56' 11" W (NAD 1927)
Channel	286 (105.1 MHz)
Effective radiated power:	0.075 kilowatt (Max-DA, H&V)
Antenna	Nicom, model BKY3P, directional
Antenna orientation	95° True
Antenna height:	
above ground:	17 meters
above mean sea level:	2340 meters
ASRN <sup>2</sup>	1251577

MB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 26, 2009**.

Sincerely,

Charles N. Miller, Engineer  
Audio Division  
Media Bureau
