File No. BNPL-20131114AOP

## Exhibit 1 – Changes Details for Amendment for Arlington Independent Radio LPFM

The technical changes are based on correcting problems with Section VI – LPFM Engineering, Tech Box which were described in the dismissal letter dated March 7, 2014. We corrected another oversight which listed Arlington Independent Media board members *without* answering the (4) Percentage of Votes and (5) Percentage of total assets. This has been corrected in Section II – Legal, Question 3A

The original application BNPL-20131114AOP contained incorrect latitude and longitude siting information for proposed transmitter site, the correct site coordinates for the proposed antenna site is above the rooftop at Tower Villas (3800 Fairfax Drive, Arlington, VA) and is included in this amendment.

Thus, the Tech Box has been corrected in #2, #4, #5 and #6 to reflect the actual proposed antenna site. Likewise, changes have been made to Section VI LPFM Engineering to #8 A (including the explanations and attachments in Exhibit 11) to reflect the proper interference contours for co-channels and adjacent channels.
