Re: CC Licenses, LLC, as DIP (CCL)
WELI(AM), New Haven, CT
Facility Identification Number: 11933
Special Temporary Authority
BESTA-20181213ACJ

Dear Mr. Davis:

This is in reference to the request filed on December 13, 2018. CCL requests a further extension of the STA granted on September 28, 2010, to operate with parameters at variance pending the filing of the required FCC Form 302 application.¹ In support of the request, CCL states that additional time is needed to complete the nighttime proof and file the application due to repairs and replacement of two towers done over the past 8 years.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ WELI(AM) is licensed for operation on 960 kHz with a power of 5 kW ND day and DA night.

Accordingly, the request for extension of the STA is **HEREBY GRANTED**, and CCL may continue to operate with parameters at variance and/or reduced power while maintaining nighttime monitor points within licensed limits (or ND using a maximum of 5 kW day and 1.25 kW at night). CCL must reduce power or cease operation if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **July 29, 2019**.

Sincerely,

A handwritten signature in blue ink, consisting of a large loop followed by a series of smaller loops and a long horizontal stroke extending to the right.

Joseph Szczesny, Engineer
