

Authorizations to be Assigned

In order to file an amendment to the instant application, CDBS requires an update to the information entered into Section III, Item 2, "Authorizations to be Assigned." Thus, the material contained therein is current. The purpose of this exhibit is to provide, in an easy to read format, changes to the "Authorizations to be Assigned" list. This exhibit includes updates not reflected in a similar exhibit submitted with the October 2007 amendment to the instant application. Specifically, this provides in tabular form: (1) call sign changes; (2) stations sold; and (3) FM translators cancelled.

Call Sign Changes

The table below notes updates to the call sign information included in response to Section III, Item 2, "Authorizations to be Assigned" which were not listed in the October 2007 amendment to the instant application.

Sold Stations

Table 2 below lists all Form 314 assignment applications consummated since the filing of the most recent amendment on October 5, 2007. Because the Licensee no longer owns these stations, they will not be sold to the Transferee and have been removed from Section III, Item 2, "Authorizations to be Assigned."

Cancelled FM Translators

Table 3 below lists the translator station included in a Transfer Application that has been cancelled since filing the October 2007 amendment. Because the station has been cancelled, it will not be sold to the Transferee and has been removed from Section III, Item 2, "Authorizations to be Assigned."
