

LPFM Preclusion Study
Santa Rosa 103.5

There are LPFM grid points in Santa Rosa on 103.3 and 103.7. However, this proposal is spaced sufficiently away from all grid points on 103.3 and 103.7.

The following map demonstrates that all grid points on 103.3 are further than the required 21 km for FM translators with service contours between 7.3 and 13.3 km.

The following map demonstrates that all grid points on 103.7 are further than the required 21 km for FM translators with service contours between 7.3 and 13.3 km.
