I am working with the station and the Asbury Park Zoning Board of Adjustment. The Board was not going to approve a 60 feet tower on top of the two-story church building and we adjourned the matter to 3/24/09 but although several alternative sites were explored, none has been finalized. They are now looking at a 70 feet tall building near by and may have an answer next week which will mean that I have to amend the pending application for the new site, notify the property owners nearby, publish a notice in the paper and submit all with engineering plans, etc. As such I am carrying the application to the meeting of 5/12/09 so we can amend for the new location. Therefore, the station needs the extension to operate at its current location and wattage while we still seek approval to relocate the tower. If you desire a more formal letter or other documentation, let me know exactly what you need and I will supply. Thanks.
