**FLORENCE, SOUTH CAROLINA**  
**April 2016**

**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Community Broadcasters, LLC ("Community"), permittee of FM translator W242CB, Channel 242D, Florence, South Carolina. Community has a construction permit to make minor changes in the W242CB facilities (BMPFT-20160323AAL). This instant application seeks a license to cover the outstanding permit. Exhibit A is a calculation of the transmitter power output for FM translator W242CB.

There are two special operating conditions/restrictions listed on the permit. The first condition states:

*"The permittee/licensee in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radio frequency electromagnetic fields in excess of FCC guidelines."*

Community states that it will reduce the power of W242CB or cease operation, as necessary, to insure that persons having access to the tower will not be exposed to radio frequency electromagnetic fields in excess of the FCC's guidelines. The second condition states:

*"Prior to commencing program test operations, FM Translator or FM Booster permittee must have on file at the Commission, FCC Form 350, Application for an FM Translator or FM Booster Station License, pursuant to 47 C.F.R. Section 74.14."*

This application satisfies that condition. Based on the foregoing, it is believed that Community has complied with all conditions and can operate W242CB in accordance with Commission's rules.
