Subject: WNIK

Dear Audrey,

WNIK main transmitter has a defective transmitter controller. Boards have being ordered from factory. In the mean time the station is on the air on its backup transmitter on main antenna. Licensed TPO is 10Kw, the present TPO is 5 Kw which makes 50% of licensed power.

If you have any questions feel free to call me at 787.203.9170.

Thanks,

Rey Moreira
