Bozeman, MT 59718-2041

Re: REIER Broadcasting Company, Inc.  
KOB(AM), Bozeman, Montana  
Facility Identification Number: 55677  
Special Temporary Authority

Dear Applicant:

This is in reference to the request filed May 24, 2019, on behalf of REIER Broadcasting Company, Inc. ("RBC"). RBC requests special temporary authority ("STA") to operate station KOB(AM) from an alternate site location with a temporary long wire antenna.<sup>1</sup> The station has been silent since June 1, 2018 and therefore must resume broadcast operations by 12:01 a.m., June 2, 2019 or its license will expire as a matter of law.

In support of the request, RBC states that KOB(AM) lost its tower due to a backhoe accident. The tower was removed from the property within 60 days of the accident as refurbishment was not possible. Thus, KOB(AM) requests STA to temporarily operate from the transmitter site of co-owned FM station KOZB(FM).

Specifically, KOB(AM) proposes to operate with a long-wire antenna from the KOZB(FM) site. The site is located 19.4 kilometers from KOB(AM)'s licensed site. Operation is proposed with 200 feet (60.96 meters) of #6 copper wire. The wire will be attached 3 feet from base of the KOZB(FM) tower up to 80 feet on the tower and then 120 feet horizontally to a utility pole. An operating power of 0.047 kilowatt is proposed.

STA requests which involve a change in transmitter site must include four critical elements: (1) Loss of the licensed site must be beyond the licensee's control; (2) STA facilities must continue to provide service to the licensed community; (3) STA facilities must maintain, as closely as

---

<sup>1</sup> KOB(AM) is licensed for operation on 1230 kHz with an unlimited hours power of 1 kilowatt, employing a non-directional antenna pattern (ND1-U).

practicable, the licensed service area<sup>2</sup> without extending it; (4) STA facilities cannot involve the construction of towers intended for permanent use by the station requesting the STA.

Accordingly, the request for STA is GRANTED. Station KOB(AM) may operate with the following facilities:

Geographic coordinates	45° 39' 26" N, 110° 48' 22" W (NAD 1927)
Frequency	1230 kHz
Hours of operation	Unlimited
Operating power	0.047 kilowatt
Antenna type	200 feet (60.96 m) of #6 copper wire

It will be necessary to further reduce power or cease operation if complaints of interference are received. KOB(AM) must notify the Commission when licensed operation is restored. KOB(AM) must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 27, 2019**.

Notwithstanding the grant of this STA or the expiration date specified herein, the station's license will expire as a matter of law if broadcast operations do not commence by 12:01 a.m., June 2, 2019. *See* Pub. Law No. 104-104, 110 Stat. 56, Section 403(1)(1996) and *Order, Silent Station Authorizations*, FCC 96-218 (released May 17, 1996). *See also Public Notice*, Expedited Processing of Applications Filed by Silent Stations, DA 96-818 (May 22, 1996). The licensee must notify the Audio Division immediately upon resumption of broadcasting.

**STA Advisory:** Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

---

<sup>2</sup> For AM - 0.5 mV/m contour; for FM - 1.0 mV/m contour.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

A handwritten signature in dark ink, reading "Jerome J. Manarchuck". The signature is fluid and cursive, with the first name "Jerome" and last name "Manarchuck" clearly legible.
