MINOR CHANGE APPLICATION - DIGITAL FLASH CUT
TV TRANSLATOR STATION K24GK (FACILITY ID 128228)
SALINA, UTAH
CH 24 0.035 KW (MAX-DA) 2062 M(RCAMSL)

Technical Exhibit

The technical exhibit supports a minor change application for construction permit for a TV Translator station K24GK on Channel 24 at Salina, Utah to convert to digital modulation.

Summary of Proposed Facilities

Below is a tabulation of the proposed paired digital facility:

Channel:	24
Geographic Coordinates:	38° 52' 37" North Latitude 111° 52' 32" West Longitude
Antenna Structure Registration:	N/A (See Figure 1, FCC TOWAIR)
Overall Tower Height:	15.5 meters
Ground Elevation:	2048 meters
Radiation Center:	2062 meters AMSL 14 meters (46 feet) AGL
Antenna Type:	Scala, 4DR-4S
Antenna Major Lobe Orientation:	355° True
Transmitter Power Output:	0.01 kilowatt (10 watts)
Transmission Line:	LDF6-50A (7/8" Foam - 70 feet)
Effective Radiated Power:	0.035 kilowatt (35 watts)

Figure 2 is a map indicating that the proposed City-Grade contour will encompass all of the city limits of Salina (derived from 2000 U.S. Census information for New Mexico).

Domestic Allocation Considerations

A study has been conducted to assure that the proposal will not create prohibited interference with other licensed, authorized or pending analog or digital TV, LPTV/translator and Class A TV stations. Using the procedures outlined in the FCC's OET-69 Bulletin, no prohibitive

interference is predicted to be caused to any other station as shown by the results provided in Figure 3.

Radiofrequency Electromagnetic Field Exposure

The proposed facilities were evaluated in terms of potential radio frequency (RF) energy exposure at ground level to workers and the general public. The radiation center for the antenna is located 14 meters above ground level. The proposed ERP of 0.035 kW is assumed. A "worst-case" relative field value of 0.2 was assumed for the Scala antenna's downward radiation. The calculated power density at ground level is 0.0003 mW/cm². This is less than 5% of the FCC's recommended limit of 0.36 mW/cm² for channel 24 for an "uncontrolled" environment.

Access to the transmitting site will be restricted and appropriately marked with warning signs. In the event that workers or other authorized personnel enter restricted areas or climb the tower, appropriate measures will be taken to assure worker safety with respect to radio frequency radiation exposure. Such measures include reducing the average exposure by spreading out the work over a longer period of time, wearing "accepted" RFR protective clothing and/or RFR exposure monitors or scheduling work when the stations are at reduced power or shut down.

It is noted that this statement only addresses the potential for radiofrequency electromagnetic field exposure. All other aspects of the environmental processing analysis will be or already have been provided to the FCC by the tower owner as part of the tower registration process.

TOWAIR Determination Results

*** NOTICE ***

TOWAIR's findings are not definitive or binding, and we cannot guarantee that the data in TOWAIR are fully current and accurate. In some instances, TOWAIR may yield results that differ from application of the criteria set out in 47 C.F.R. Section 17.7 and 14 C.F.R. Section 77.13. A positive finding by TOWAIR recommending notification should be given considerable weight. On the other hand, a finding by TOWAIR recommending either for or against notification is not conclusive. It is the responsibility of each ASR participant to exercise due diligence to determine if it must coordinate its structure with the FAA. TOWAIR is only one tool designed to assist ASR participants in exercising this due diligence, and further investigation may be necessary to determine if FAA coordination is appropriate.

DETERMINATION Results

Structure does not require registration. There are no airports within 8 kilometers (5 miles) of the coordinates you provided.

Total scenarios = 1

Result key: 1
Scenario 1 Affected station 85 K24GK
Before Analysis

Results for: 24A UT SALINA USERRECORD01 APP
HAAT 223.0 m, ATV ERP 0.0 kW
POPULATION AREA (sq km)
within Noise Limited Contour 3944 592.5
not affected by terrain losses 3944 564.6
lost to NTSC IX 0 0.0
lost to additional IX by ATV 0 0.0
lost to ATV IX only 0 0.0
lost to all IX 0 0.0

Potential Interfering Stations Included in above Scenario 1
