ENVIRONMENTAL AND RADIO FREQUENCY EXPOSURE STATEMENT
MEREDITH CORPORATION
MINOR CHANGE IN LICENSED FACILITY BLCDT20051205ADF
KPHO-DT, PHOENIX, ARIZONA
CH 17, 1000 KW-D, 105 MTR AGL

The proposed modification of KPHO-DT licensed facility BLCDT20051205ADF will not involve any changes to the current tower location. The proposed relocation of the digital antenna will replace the analog antenna and, therefore, will not result in any environmental impact.

The KPHO-DT post-transition digital facility, operating on channel 17, was evaluated in terms of potential radio frequency (RF) energy exposure at ground level to workers and the general public. The radiation center for the proposed antenna is located 105 meters above ground level. An average power level of 1000 kW ERP was utilized in the calculations. The calculated power density at a point 2 meters (6.6 feet) above ground level is 0.0154 mW/cm² which is 0.94% of the FCC's recommended limit of 1.637 mW/cm² for an occupational/controlled environment and 4.71% of 0.327 mW/cm² for general public/uncontrolled exposure.

The total contribution of all nearby, existing and the proposed facilities was also evaluated in terms of potential radio frequency (RF) energy exposure at ground level to workers and the general public. Total contribution was calculated to be within the allowable exposure limit for both workers and the general public.

The South Mountain antenna farm is a controlled access site. Access to the transmitting tower and any radio frequency generating equipment is restricted and appropriately marked with warning signs. In the event that workers or other authorized personnel enter restricted areas or climb the tower, appropriate measures will be taken to assure worker safety with respect to radio frequency radiation exposure. Such measures include reducing the average exposure by spreading out the work over a longer period of time, wearing "accepted" RFR protective clothing and/or RFR exposure monitors or scheduling work when the stations are at reduced power or shut down.
