9

- This list is best printed in LANDSCAPE mode.
- Use the TEXT SIZE input on the [FM Query](#) page to change the text size in the list below, for easier printing or viewing.
- Click on the blue Call Sign or blue Facility ID Number to retrieve more detailed information from the FM Query, including access to the CDBS database records pertaining to that station.
- Records for stations outside the USA are derived from international notifications.
- License, application, and construction permit (CP) coordinates shown in the FM Query are NAD 27 coordinates.
- Antenna Structure Registration (ASR) coordinates are NAD 83.

The Preliminary FM Search above lists the FM stations, allotments, and rulemakings that the FCC will consider during review of an FM broadcast station construction permit application. The Preliminary FM Search checks distances only, depending depending on the frequency difference:

0 MHz difference (cochannel):	Search radius: 310 km
0.2 MHz difference (first adjacent channel):	Search radius: 250 km
0.4 MHz difference (second adjacent channel):	Search radius: 160 km
0.6 MHz difference (third adjacent channel):	Search radius: 120 km
53 or 34 channels (if channel):	Search radius: 50 km

No contour protection analysis or community of license coverage analysis is performed. The Commission may consider additional station records that might not appear on this list as necessary. Refer to the [FM spacing tables](#) in [Section 73.207](#) for the spacings governing FM commercial stations.

\*\*\* 43 FM Records within the FM Preliminary Study distance of 47° 30' 33.00" N, 120° 14' 22.00" W \*\*\*

### Related Nonbroadcast Facilities: ULS Search

Using a broadcast station's facility ID number, you may search in the WTB's ULS database for nonbroadcast station records that are related to radio and TV broadcast stations, such as microwave facilities. Use the [ULS Radio Services List](#) to determine the nonbroadcast station's service. Not every AM, FM, or TV broadcast station will have related nonbroadcast operations.

Output will appear in a new browser window or tab. [Alternate Form](#)
