Application to Modify Digital Television Station Construction Permit

prepared for

Gray Television Licensee, LLC
WSAZ-DT Huntington, WV
Facility ID 36912
Ch. 23 724 kW 367 m

Gray Television Licensee, LLC ("Gray") is the licensee of television station WSAZ-TV, analog Channel 3, Huntington, WV. *Gray* is authorized by a "maximized" Construction Permit ("CP", BMPCDT-20080619AAD) to operate the paired WSAZ-DT digital Channel 23 facility at 1000 kW effective radiated power ("ERP") and an antenna height above average terrain ("HAAT") of 390 meters with a top-mount nondirectional antenna. WSAZ-DT will remain on its current digital Channel 23 for the post-transition period, as established in Appendix B of the Seventh Report and Order in MB Docket 87-278.

WSAZ-DT is currently operating on Channel 23 under Special Temporary Authority ("STA") with a side mount antenna having an ERP of 724 kW and 364 meters antenna HAAT (BMDSTA-20050429AFH, as extended). The top-mount Channel 23 facility specified in the CP would require installation of a new antenna in place of the existing top-mounted analog Channel 3 transmitting antenna. *Gray* has determined that construction of the top-mount Channel 23 facility pursuant to the CP would require substantial tower modifications at considerable expense. *Gray* herein seeks to modify the CP in order to license the current side-mount STA operation as its permanent facility, in lieu of constructing the top-mount facility. The proposed WSAZ-DT facility is for use during the pre-transition and post-transition periods.

The proposed digital Channel 23 operation will employ the existing non-directional antenna system authorized by STA. The antenna is a horizontally polarized Dielectric model TFU-20DSC-R O4. The Channel 23 antenna is side-mounted on the existing WSAZ-TV antenna supporting structure, having FCC Antenna Structure Registration ("ASR") number 1035121. No

change to the overall structure height and no tower work are required to carry out this proposal. No change in antenna height above ground level or above mean sea level is proposed, however the antenna HAAT is recalculated as 367 meters based on the use of USGS 3 arc-second digitized terrain data.

A map is supplied as **Figure 1**, which depicts the standard predicted coverage contours. This map includes the boundaries of Huntington, WSAZ-DT's principal community. As demonstrated thereon, the proposed facility complies with §73.625(a)(1), as the entire principal community will be encompassed by the 48 dB μ contour.

The proposed WSAZ-DT facility's predicted service population provides a 94.9 percent match of the Appendix B facility, as detailed in the table below.

Post-Transition Population Summary		
Population Summary (2000 Census) OET Bulletin 69 method	Appendix B	Proposed
Within Noise Limited Contour	1,252,141	1,191,968
Not affected by terrain losses	1,188,939	1,125,654
Lost to all interference	6,629	3,763
Net DTV Service	1,182,310	1,121,891
Match of Appendix B	---	94.89%

The proposal falls 0.11 percent short of achieving the FCC's target of at least a 95 percent match of the Appendix B population. The Appendix B facility parameters for WSAZ-DT specify 724 kW ERP at 402 meters HAAT, which represents the same ERP as proposed herein but with a 35 meter difference in antenna HAAT. In support of grant of the instant application, **Figure 2** is supplied to demonstrate that the proposed WSAZ-DT facility's dipole factor-adjusted service contour encompasses all of the area within the WSAZ analog Channel 3 Grade B contour. The WSAZ-TV analog service population is 1,003,602 persons (2000 census, OET Bulletin 69 method), and the 1,121,891 population achieved by the proposed WSAZ-DT represents a 111.8 percent match of the analog service. Thus, no loss in service to any of the analog Grade B area will result and there will be no change from existing digital service.

The proposed ERP / HAAT combination exceeds the allotment value for the pre-transition period (444.5 kW / 388 m from Appendix B of the Sixth Report and Order in MB Docket 87-278). Interference analysis per OET Bulletin 69¹ shows that the proposal complies with the Commission's 2% / 10% *de minimis* interference limits for operation during the transition, as summarized in **Table 1**. Protection requirements towards authorized Class A stations are satisfied. Thus, this proposal complies with the provisions of §73.623(c)(2) of the Commission's rules for pre-transition operation.

Regarding impact to post-transition operations, since no extension in contour location beyond that of the 2007 Appendix B (Seventh R&O) allotment will result, interference analysis to other post-transition television facilities is not required.

The nearest FCC monitoring station is 352 km distant at Laurel, MD. This exceeds the threshold minimum distances specified in §73.1030(c)(3) that would suggest consideration of the monitoring station. The site is not located within the areas requiring coordination with "quiet" zones specified in §73.1030(a) and (b). There are no AM stations within 3.2 kilometers of the site, based on information contained within the Commission's database. The site location is within the Canadian coordination zone (352 km to the Canada border), however further international coordination is not necessary for the proposed facility reduction.

Human Exposure to Radiofrequency Electromagnetic Field (Environmental)

The proposed transmitting antenna's installation will involve a reduction in overall tower height. Since no increase in height is proposed, it is believed that this application may be categorically excluded from environmental processing pursuant to §1.1306 of the Commission's rules.

¹FCC Office of Engineering and Technology Bulletin number 69, *Longley-Rice Methodology for Evaluating TV Coverage and Interference*, February 6, 2004 ("OET-69"). The implementation of OET-69 for this study followed the guidelines of OET-69 as specified therein. A standard cell size of 2 km was employed. Comparisons of various results of this computer program (run on a Sun Sparc processor) to the Commission's implementation of OET-69 show excellent correlation.

The proposed operation was evaluated for human exposure to RF energy using the procedures outlined in the Commission's OET Bulletin Number 65. Based on OET-65 equation (10), and considering 15 percent antenna relative field in downward elevations (pattern data shows less than 10 percent relative field at angles 15 to 90 degrees below the antenna), the calculated signal density near the tower at two meters above ground level attributable to the proposed facility is $3.1 \mu\text{W}/\text{cm}^2$, which is 0.9 percent of the general population/uncontrolled maximum permitted exposure limit. This is well below the five percent threshold limit described in §1.1307(b) regarding sites with multiple emitters, categorically excluding the applicant from responsibility for taking any corrective action in the areas where the proposal's contribution is less than five percent.

The general public will not be exposed to RF levels attributable to the proposal in excess of the FCC's guidelines. RF exposure warning signs will continue to be posted. With respect to worker safety, the applicant will coordinate exposure procedures with all pertinent stations and will reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from RF electromagnetic field exposure in excess of FCC guidelines.

Certification

The undersigned hereby certifies that the foregoing statement and associated attachments were prepared by him or under his direction, and that they are true and correct to the best of his knowledge and belief.

SECTION III-D - DTV Engineering

Complete Questions 1-5, and provide all data and information for the proposed facility, as requested in Technical Specifications, Items 1-13.

Pre-Transition Certification Checklist: An application concerning a pre-transition channel must complete questions 1(a)-(c), and 2-5. A correct answer of "Yes" to all of the questions will ensure an expeditious grant of a construction permit application to change pre-transition facilities. However, if the proposed facility is located within the Canadian or Mexican borders, coordination of the proposal under the appropriate treaties may be required prior to grant of the application. An answer of "No" will require additional evaluation of the applicable information in this form before a construction permit can be granted.

Post-Transition Expedited Processing. An application concerning a post-transition channel must complete questions 1(a), (d)-(e), and 2-5. A station applying for a construction permit to build its post-transition channel will receive expedited processing if its application (1) does not seek to expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622(i) ("new DTV Table Appendix B"); (2) specifies facilities that match or closely approximate those defined in the new DTV Table Appendix B facilities; and (3) is filed within 45 days of the effective date of Section 73.616 of the rules adopted in the Report and Order in the Third DTV Periodic Review proceeding, MB Docket No. 07-91.

1. The proposed DTV facility complies with 47 C.F.R. Section 73.622 in the following respects:	<input checked="" type="radio"/> Yes <input type="radio"/> No
(a) It will operate on the DTV channel for this station as established in 47 C.F.R. Section 73.622.	<input checked="" type="radio"/> Yes <input type="radio"/> No
(b) It will operate a pre-transition facility from a transmitting antenna located within 5.0 km (3.1 miles) of the DTV reference site for this station as established in 47 C.F.R. Section 73.622.	<input checked="" type="radio"/> Yes <input type="radio"/> No
(c) It will operate a pre-transition facility with an effective radiated power (ERP) and antenna height above average terrain (HAAT) that do not exceed the DTV reference ERP and HAAT for this station as established in 47 C.F.R. Section 73.622.	<input type="radio"/> Yes <input checked="" type="radio"/> No
(d) It will operate at post-transition facilities that do not expand the noise-limited service contour in any direction beyond that established by Appendix B of the Seventh Report and Order in MB Docket No. 87-268 establishing the new DTV Table of Allotments in 47 C.F.R. § 73.622(i) ("new DTV Table Appendix B").	<input checked="" type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A
(e) It will operate at post-transition facilities that match or reduce by no more than five percent with respect to predicted population from those defined in the new DTV Table Appendix B.	<input type="radio"/> Yes <input checked="" type="radio"/> No <input type="radio"/> N/A
2. The proposed facility will not have a significant environmental impact, including exposure of workers or the general public to levels of RF radiation exceeding the applicable health and safety guidelines, and therefore will not come within 47 C.F.R. Section 1.1307. Applicant must submit the Exhibit called for in Item 13.	<input checked="" type="radio"/> Yes <input type="radio"/> No
3. Pursuant to 47 C.F.R. Section 73.625, the DTV coverage contour of the proposed facility will encompass the allotted principal community.	<input checked="" type="radio"/> Yes <input type="radio"/> No
4. The requirements of 47 C.F.R. Section 73.1030 regarding notification to radio astronomy installations, radio receiving installations and FCC monitoring stations have either been satisfied or are not applicable.	<input checked="" type="radio"/> Yes <input type="radio"/> No
5. The antenna structure to be used by this facility has been registered by the Commission and will not require registration to support the proposed antenna, OR the FAA has previously determined that the proposed structure will not adversely effect safety in air navigation and this structure qualifies for later registration under the Commission's phased registration plan, OR the proposed installation on this structure does not require notification to the FAA pursuant to 47 C.F.R. Section 17.7.	<input checked="" type="radio"/> Yes <input type="radio"/> No

SECTION III-D - DTV Engineering**TECHNICAL SPECIFICATIONS**

Ensure that the specifications below are accurate. Contradicting data found elsewhere in this application will be disregarded. All items must be completed. The response "on file" is not acceptable.

TECH BOX

1. Channel Number: DTV 23 Analog TV, if any	3
2. Zone: <input checked="" type="radio"/> I <input type="radio"/> II <input type="radio"/> III	
3. Antenna Location Coordinates: (NAD 27) Latitude: Degrees 38 Minutes 30 Seconds 36	<input checked="" type="radio"/> North <input type="radio"/> South
Longitude: Degrees 82 Minutes 13 Seconds 10	<input checked="" type="radio"/> West <input type="radio"/> East
4. Antenna Structure Registration Number: 1035121 <input type="checkbox"/> Not Applicable <input type="checkbox"/> Notification filed with FAA	
5. Antenna Location Site Elevation Above Mean Sea Level:	308.2 meters
6. Overall Tower Height Above Ground Level:	327.3 meters
7. Height of Radiation Center Above Ground Level:	280.9 meters
8. Height of Radiation Center Above Average Terrain :	366.6 meters
9. Maximum Effective Radiated Power (average power):	724 kW
10. Antenna Specifications: a. Manufacturer DIE Model TFU-20DSC-R O4	

b. Electrical Beam Tilt: 1.0 degrees <input type="checkbox"/> Not Applicable	[Exhibit 42]
c. Mechanical Beam Tilt: degrees toward azimuth degrees True <input checked="" type="checkbox"/> Not Applicable	
Attach as an Exhibit all data specified in 47 C.F.R. Section 73.625(c).	
d. Polarization: <input checked="" type="radio"/> Horizontal <input type="radio"/> Circular <input type="radio"/> Elliptical	
e. Directional Antenna Relative Field Values: <input checked="" type="checkbox"/> Not applicable (Nondirectional)	
[For a composite directional (not off-the-shelf) antenna, press the following button to fill in the relative field values subform.] [Relative Field Values]	
If a directional antenna is proposed, the requirements of 47 C.F.R. Sections 73.625(c) must be satisfied. Exhibit required. [Exhibit 43]	
11. Does the proposed facility satisfy the pre-transition interference protection provisions of 47 C.F.R. Section 73.623(a) (Applicable only if Certification Checklist Items 1(a), (b), or (c) are answered "No.") and/or the post-transition interference protection provisions of 47 C.F.R. Section 73.616?	<input checked="" type="radio"/> Yes <input type="radio"/> No [Exhibit 44]
If "No," attach as an Exhibit justification therefor, including a summary of any related previously granted waivers.	
12. If the proposed facility will not satisfy the coverage requirement of 47 C.F.R. Section 73.625, attach as an Exhibit justification therefore. (Applicable only if Certification Checklist item 3 is answered "No.")	[Exhibit 45]
13. Environmental Protection Act. Submit in an Exhibit the following: If Certification Checklist Item 2 is answered "Yes," a brief explanation of why an Environmental Assessment is not required. Also describe in the Exhibit the steps that will be taken to limit RF radiation exposure to the public and to persons authorized access to the tower site. By checking "Yes" to Certification Checklist Item 2, the applicant also certifies that it, in coordination with other users of the site, will reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic exposure in excess of FCC guidelines. If Certification Checklist Item 2 is answered "No," an Environmental Assessment as required by 47 C.F.R. Section 1.1311.	[Exhibit 46]

PREPARERS CERTIFICATION ON SECTION III MUST BE COMPLETED AND SIGNED.**SECTION III - PREPARER'S CERTIFICATION**

I certify that I have prepared Section III (Engineering Data) on behalf of the applicant, and that after such preparation, I have examined and found it to be accurate and true to the best of my knowledge and belief.
