RE: Engineer's Affidavit

Erik,

The antenna removal and replacement authorized by application BPED-20160615AAS was completed on 19 August 2016. The tower extension structure is designed to retain the azimuth of the mounting pole and antenna assembly. I have reviewed the drawings, discussed the requirements with the on-site crew, and observed the installation of the antenna assembly.

I am a qualified broadcast engineer with over 30 years of licensed experience. Originally a First Class Radiotelephone license, I hold General Radiotelephone Operator License number PG-14-2918. I am certified by the Society of Broadcast Engineers as a Certified Broadcast Radio Engineer with Digital Radio Broadcast endorsement. I have historical experience with this site and antenna.

I certify that the antenna components and attachments have not been moved or altered during this project, and that the azimuth has been faithfully transferred to the extended structure.

Sincerely,

Jon Kasprick, PE, CBRE
Engineer, KGRG
