

ENGINEERING STATEMENT
Renard Communications Corp.
May, 2018

Renard Communications Corp. (“Renard”) is the licensee of WSEN(FM), Ch. 280A, Mexico, NY. The station has construction permit (BPH-20150406ACR) to relocate and upgrade to Ch. 280C3 facilities which is now expiring. Renard has acquired ownership of the property at the site specified in the application herein and has prepared this application so upon grant, the station may implement the improved facilities.

The C3 allotment coordinates are: N 43-36-19, W 75-56-7 and are listed in the application in Section III-B, Question 4. No change is proposed to the allotment reference coordinates. To minimize any delay in processing, this proposal maintains the 34 dBu (50,10) interfering contour within the previously authorized 34 dBu contour (Figure 1) so referral to Canada should not be necessary. Also, the 34 dBu contour is contained within the maximum parameters for the Mexico, NY C3 allotment with respect to Canada.

Figure 2 depicts that the 70 dBu contour will fully encompass the boundary limits of the community of license.

There is no impact to any other co- or adjacent channel stations as the site meets all of the minimum spacing requirements specified in Section 73.207 of the Commission’s rules.
