

**ENGINEERING STATEMENT**  
OF  
**JOHN F.X. BROWNE, P.E.**  
IN SUPPORT OF AN APPLICATION FOR  
**MINOR MODIFICATION OF A POST-TRANSITION CONSTRUCTION PERMIT**  
AND  
**REQUEST FOR WAIVER**  
**WMTJ-DT**  
**FAJARDO, PR**

**Background**

Sistema Universitario Ana G. Mendez, Inc. (Mendez) is the licensee of WMTJ-DT which has been authorized to operate its post-transition DTV facility on Channel 16 (BMPEDT-20070629AEN) at Fajardo, PR, with an ERP of 140 kW at an HAAT of 852m. The tower is located at the following coordinates:

(NAD27)  
18° 18' 35" N  
65° 47' 43" W

WMTJ now wishes to "maximize" the post-transition facility ERP to 178 kW; all other facility parameters will remain the same.

## Site

While the proposed site is 70km from the FCC monitoring station at Santa Isabella, PR, the mountainous terrain of central Puerto Rico completely prevents any line-of-sight propagation condition between the WMTJ transmitter and the FCC site.

The proposed WMTJ facility is located on the island of Puerto Rico, and, therefore, the Interference Office located at the Arecibo Observatory will be notified of its plans to change its facility parameters by forwarding a copy of this "maximization" application.

## Antenna System and Tower

WMTJ-DT proposes to use its existing digital Dielectric TFU-16DSC-R S300 directional antenna (specifications attached hereto as Exhibit 1a – Exhibit 1e). The antenna is installed on a tower that is less than 200 ft. tall above ground level and, therefore, the tower is unregistered (same tower / heights as authorized in BMPEDT-20070629AEN). The WMTJ antenna will have a center of radiation of 1058.2m AMSL (with a calculated HAAT of 852.1m).

## Coverage

The entire principal community of Fajardo, PR is well within the predicted F(50,90) 48 dBu contour based on the proposed 178 kW ERP.

## Interference and Request for Waiver

Studies were conducted with the proposed parameters using software that emulates the software used by the FCC (OET-69 analysis). The results of the study indicate that WMTJ would cause more than the 0.5% new interference to the Appendix B (allotment) facility of WVEO (Ch. 17 at Aguadilla, PR), but would not cause more than 0.5% new interference to the existing (and recently granted) WVEO construction permit facility (BMPCDT-20060705ABD);

therefore, Mendez has initiated discussions with the licensee of WVEO to determine whether its Appendix B facility needs to be protected (given that its recently granted CP differs from this facility and is not adversely affected) and, if so, whether it would agree to accept the calculated, theoretical interference. To the extent that it may be necessary, Mendez requests a waiver of the interference protection requirements. Upon completion of these discussions and negotiations, the Commission will be notified of the results.

### **Environmental/RFR**

The proposed construction is located within the Caribbean Nation Forest. Mendez has received permission to construct the facility from the US Forrest Service which conducted a compete environmental review in accordance with its standards and requirements under NEPA. Thus, the proposed construction does not require preparation of an Environmental Assessment.

The additional ground level RFR contributed to the site by this proposal in public areas is calculated to be  $0.005212 \text{ mW/cm}^2$  which is less than 5% of the MPE for public exposure ( $0.32 \text{ mW/cm}^2$ ) at the proposed frequency and, therefore, the proposal is excluded from further consideration.

WMTJ agrees to comply with the Commission's requirements regarding power adjustments or cessation of operation as may be necessary to ensure a compliant environment for worker access. Workers will be encouraged to wear personal RFR monitors when on the structure. The tower base is enclosed by a locked security fence and appropriate signage warning of RFR hazards is posted.

### **Certification**

I hereby certify that the foregoing report or statement was prepared by me but may include work performed by others under my supervision or direction. The statements of fact contained therein are believed to be true and correct based on personal knowledge,

information and belief unless otherwise stated; with respect to facts not known of my own personal knowledge, I believe them to be true and correct based on their origin from sources known to me to be generally reliable and accurate. I have prepared this document with due care and in accordance with applicable standards of professional practice.

A handwritten signature in black ink, appearing to read "John F. X. Browne".
