

[Exhibit 13]

Non-Interference Compliance

Regarding Facility id 152350

Channel 225

Description of Exhibit 13 Contents

This exhibit demonstrates that the proposed facility complies with contour overlap and interference protection provisions in all of the applicable rule sections and that this application for a construction permit is in full compliance with 47 C.F.R. § 74.1204.

Let it be noted that should any actual real world interference occur, the applicant acknowledges that it will promptly suspend operation of this translator in accordance with 47 C.F.R. § 74.1203.

Page 2 of this exhibit contains the tabulated data from the interference analysis, which shows all stations whose protected contours come within 50 km of the 34 dB μ F(50,10) contour of the proposed translator. These tabulated values were calculated using data from the FCC's CDBS files and 30 arc second terrain data. The column labeled "Adj" shows the number of channels difference between the entry and the proposed translator. The column labeled "Dist" shows the distance in km. The column labeled "Overlap" shows the area of contour overlap in square kilometers.

Note: The adjacent channel study indicates prohibitive overlap with 2 World Radio Link, W225BA, Hastings, MI (FIN: 152364) applications BLFT-20111004ADZ and BSTA-20110804ABV. It is anticipated that BSTA-20110804ABV will be dismissed before the proposed CP Mod is processed. A construction permit to move the location and channel for the Hastings translator has been granted. It is anticipated that that BLFT-20111004ADZ will be moot when a new license is issued for W225BA on a non-interfering channel.

Applicant is requesting that the Commission delay processing of this application until W225BA is licensed at its newly authorized location and channel.
