

July 2019
KVVA-FM Channel 296C3 Sun Lakes, AZ
KDVA(FM) Channel 294A Buckeye, AZ
Comprehensive Allocation Study

Contingent Application Group

The instant application is being filed as a part of a two-station contingent group comprised of two minor change applications, one request for a change in coordinates of a vacant allotment, plus one “show cause” channel change request. Two of the stations, KVVA-FM and KDVA(FM), are commonly licensed to Entravision Holdings, LLC (“Entravision”). By these applications, it is proposed that the following changes be made:

- 1) The KVVA-FM license is modified from Channel 296C3 at Apache Junction to Channel 296C3 at Sun Lakes, with a change in transmitter site;
- 2) In order to accommodate the KVVA-FM modification, the KDVA license is modified from Channel 295A at Buckeye to Channel 294A at Buckeye, at the existing KDVA transmitter site;
- 3) In order to accommodate the KDVA modification, it is requested that the Commission issue a “show cause” to modify the license of KPPV at Prescott Valley, Arizona, to operate on Channel 295C2 at the existing transmitter site, and;
- 4) In order to accommodate the KVVA-FM modification, the coordinates of vacant Channel 297C2 at Aguila, Arizona be modified.

Proposed Allotment and Transmitter Sites

Station	Allotment Site Coordinates NAD27	Transmitter Site Coordinates NAD27
KVVA-FM 296C3 Sun Lakes, Arizona	33 - 21 - 43 111 - 58 - 03	33 - 20 - 00 112 - 03 - 49
KDVA 294A Buckeye, Arizona	33 - 27 - 01 112 - 35 - 58	33 - 27 - 01 112 - 35 - 58
KPPV 295C2 Prescott Valley, Arizona	34 - 29 - 25 112 - 32 - 00	34 - 29 - 25 112 - 32 - 00
Vacant 297C2 Aguila, Arizona	33 - 56 - 32 113 - 15 - 39	dna

KVVA-FM Channel 296C3 Sun Lakes: Allotment Site

The attached spacing study shows that the proposed Sun Lakes 296C3 allotment site meets the co-channel and adjacent channel spacing requirements for Class C3 stations as prescribed in §73.207 of the Commission's Rules, with the exception of a short-spacing to the licensed operation of KDVA on Channel 295A at Buckeye. By simultaneously-filed application, however, KDVA is proposed to be modified to operate on Channel 294A. The proposed KVVA-FM allotment site is fully-spaced to the simultaneously-proposed KDVA allotment site on Channel 294A.

The proposed Sun Lakes 296C3 allotment site is indicated to be short-spaced to the licensed operation of KAZV on Channel 297C2 at Aguila, Arizona. However, the KAZV license expired as a matter of law on July 10, 2019, for failure to operate for a twelve month period. (See BLSTA-20180809ABQ, which notified the Commission that KAZV had gone silent on July 10, 2018. There has been no resumption notice filed.) By this application, it is requested that the Commission modify the Aguila Channel 297C2 allotment coordinates to: N 33-56-32 x W 113-15-39. The proposed KVVA-FM allotment site is fully-spaced to the simultaneously-proposed Aguila Channel 297C2 allotment site coordinates.

KVVA-FM Channel 296C3 Sun Lakes: Transmitter Site

The attached spacing study shows that the proposed KVVA-FM transmitter site meets the co-channel and adjacent channel spacing requirements for Class C3 stations as prescribed in §73.207 of the Commission's Rules, with the exception of a short-spacing to the licensed operation of KDVA on Channel 295A at Buckeye. By simultaneously-filed application, however, KDVA is proposed to be modified to operate on Channel 294A. The proposed KVVA-FM transmitter site is fully-spaced to the simultaneously-proposed KDVA transmitter site on Channel 294A.

The proposed KVVA-FM transmitter site is indicated to be short-spaced to the licensed operation of KAZV on Channel 297C2 at Aguila, Arizona. However, the KAZV license expired as a matter of law on July 10, 2019, for failure to operate for a twelve month period. (See BLSTA-20180809ABQ, which notified the Commission that KAZV had gone silent on July 10, 2018. There has been no resumption notice filed.) By this application, it is requested that the Commission modify the Aguila Channel 297C2 allotment coordinates. The proposed KVVA-FM transmitter site is fully-spaced to the simultaneously-proposed Aguila Channel 297C2 allotment site coordinates.

KDVA Channel 294A Buckeye: Single Allotment and Transmitter Site

A single allotment and transmitter site is proposed for KDVA on Channel 294A at Buckeye, that being the presently-licensed KDVA transmitter site. The attached spacing study shows that the proposed KDVA Channel 294A allotment and transmitter site meets the co-channel and adjacent channel spacing requirements for Class A stations as prescribed in §73.207 of the Commission's Rules, with the exception of a short-spacing to the licensed operation of KPPV on Channel 294C2 at Prescott Valley. By this application, however, it is being requested that KPPV be modified to operate on Channel 295C2. The proposed KDVA facility is fully-spaced to the proposed KPPV facility on Channel 295C2.

KPPV Channel 295C2 Prescott Valley: Single Allotment and Transmitter Site

The attached spacing study shows that operation of KPPV on Channel 295C2 at its licensed transmitter site meets the co-channel and adjacent channel spacing requirements for Class C2 stations as prescribed in §73.207 of the Commission's Rules, with the exception of a short-spacing to the licensed operation of KDVA on Channel 294A at Buckeye. By simultaneously-filed application, however, KDVA is proposed to operate on Channel 294A. Operation of KPPV on Channel 295C2 is fully-spaced to the simultaneously-proposed KDVA facility on Channel 294A.

Show Low: The spacing study indicates a short-spacing to a reserved allotment on Channel 295C at Show Low, Arizona. Channel 295C at Show Low is not an active proposal or reservation. The Show Low 295C proposal was advanced as part of an application by KIKO-FM 247C2 Claypool, requesting a move to 243C2 Claypool. In order to effect that change, the KIKO-FM licensee requested that Channel 295C2 be substituted for Channel 243C at Show Low, for use by KRFM. The KIKO-FM licensee abandoned that proposal, but the Show Low 295C reservation has remained in the database. KIKO-FM subsequently pursued its channel change again, but with the cooperation of KRFM in moving to Channel 253C0 in lieu of Channel 295C. KIKO-FM is now licensed on Channel 243C2, and KRFM is licensed on Channel 253C0. Therefore, the Show Low Channel 295C entry in the database is stale and is no impediment to the proposed modification of KPPV.

Star Valley: The spacing study indicates a short-spacing to a proposal to add Channel 295A as a vacant allotment at Star Valley, Arizona. On June 21, 2017, Kona Coast Radio, LLC

(Kona Coast) filed a Petition for Rulemaking, proposing the addition of Channel 242A at Star Valley. The Kona Coast proposal was never assigned a docket number. Subsequently on August 21, 2017, 1TV.Com, Inc. (1TV) advanced a proposal (in the form of an informal comment) for Channel 295A at Star Valley as an alternative to Channel 242A.

On April 25, 2018, the Commission issued a letter returning the Kona Coast Petition for Rulemaking, and dismissing their associated Form 301 application for Channel 242A at Star Valley. Therefore, 1TV's informal comment promoting Channel 295A at Star Valley in lieu of Channel 242A was rendered moot, and warrants no further consideration in this application.

Show Cause Request: With regard to this involuntary channel change, it is respectfully requested that the Commission issue an Order to Show Cause to Prescott Valley Broadcasting Co., Inc., the licensee of KPPV. The applicant pledges to reimburse the licensee of KPPV for its reasonable expenses in connection with the foregoing channel change, under the terms prescribed by the Commission in *Circleville, Ohio*, 8 FCC Rcd 159 (1967).

Vacant Channel 297C2 Aguila: Allotment Site Coordinate Change

The license for KAZV Channel 297C2 Aguila expired as a matter of law on July 10, 2019, for failure to operate for a twelve month period. (See BLSTA-20180809ABQ, which notified the Commission that KAZV had gone silent on July 10, 2018. There has been no resumption notice filed.)

By this application, it is requested that the Commission modify the Aguila Channel 297C2 allotment coordinates to: N 33-56-32 x W 113-15-39. This site is located 11 kilometers from the far side of the community of Aguila. The standard 70 dBu contour distance for a Class C2 station is 32.6 kilometers, and so therefore this allotment will provide 70 dBu service to 100% of that community.
