

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CAPSTAR TX LIMITED PARTNERSHIP

This statement and the attached figures were prepared on behalf of Capstar TX Limited Partnership. (“CTLP”), a licensee subsidiary of Clear Channel Communications, Inc. (Clear Channel). CTLP proposes to modify the facilities of WFMF (FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

Call Sign	State	City	Freq	ERP_w	Class
WFMF(FM)	LA	Baton Rouge	102.5	100000	C
KRVE(FM)	LA	Bursly	96.1	43000	C2
WYNK(FM)	LA	Baton Rouge	101.5	96000	C
KFXN(FM)	LA	Houma	104.1	100000	C
WYLD(AM)	LA	New Orleans	940	10000	B
WJBO(AM)	LA	Baton Rouge	1150	5000	B
WSKR(AM)	LA	Denham Springs	1210	10000	B
WYNK(AM)	LA	Baton Rouge	1380	5000	D

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission’s multiple ownership rules¹.

There are no other principal community coverage contours controlled or proposed to be controlled by CTLP that overlap or intersect the principal community coverage contour of the proposed facility of WFMF.

Radio Markets

The “radio market” applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. The predicted principal community

¹ See 47 C.F.R. Section 73.3555.

contours of all the stations studied herein (as tabulated in *Table 1* above), are shown in *Figure 1*. These mutually overlapping contours form two “radio markets” for analysis under the Commission’s rules.

Radio Market number 1 is defined by the mutually overlapping principal community contours of WFMF(FM), KRVE(FM), WYNK(FM), KFXN(FM), WJBO(AM), WSKR(AM) and WYNK(AM).

Radio Market number 2 is defined by the mutually overlapping principal community contours of WFMF(FM), KRVE(FM), WYNK(FM), KFXN(FM), WYLD(AM), and WSKR(AM).

Count of Stations in Defined Markets

The number of radio stations in a “radio market” is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject commonly owned or controlled stations.

In “radio market 1” as studied herein, there are at least 30 radio stations, including the subject co-owned stations, that overlap or intersect with the defined “radio market.”

Figure 2 is the tabulation of some of the radio stations identified in “radio market 1”.

In “radio market 2” as studied herein, there are at least 15 radio stations, including the subject co-owned stations, that overlap or intersect with the defined “radio market.”

Figure 3 is the tabulation of some of the radio stations identified in “radio market 2”.

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission’s AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. Section 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. Section 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with Section 73.3555(a) of the FCC Rules.

Sincerely,

Troy G. Langham
FCC Engineering Specialist
Cleveland Radio Licenses, LLP.
