

5700 West Oaks Boulevard ♦ Rocklin ♦ California ♦ 95765

Compliance with 47 C.F.R. 73.215(e)

The proposed facility is a class C3 that will serve Monticello, Florida on channel 220.

According to 47 C.F.R. 73.207(a),

“Except for assignments made pursuant to Sec. 73.213 or 73.215, FM allotments and assignments must be separated from other allotments and assignments on the same channel (co-channel) and five pairs of adjacent channels by not less than the minimum distances specified in paragraphs (b) and (c) of this section.”

The distance between the proposed facility meets the separation requirements of 47 C.F.R. 73.207(b) except for WDDQ, channel 221A, Adel, Georgia and WNFK, channel 221A, Perry, Florida.

This application proposes contour protection for WDDQ and WNFK according to the guidelines of 47 C.F.R. 73.215. 47 C.F.R. 73.215(e) states that the minimum separation requirement between a class C3 and a class A facility, which are separated by 200 kHz, is 72 km. Exhibit 14-B shows that WDDQ is separated from the proposed facility by 73.53 km and that WNFK is separated from the proposed facility by 77.4 km

Therefore, the proposed facility is permitted to use contour protection toward the short-space facilities (See Exhibit 15 for compliance with contour protection requirements).
