

## **EXHIBIT 7**

This facility was constructed with a SWR SWLP20OI/CP omniod antenna rather than the Scala 4DR-16-4HO nondirectional antenna. The installed antenna has a 0 degree orientation. The relative field values for this antenna are identical to an SWR SWLP24OI off the shelf antenna. At no point do the Grade A and Grade B contours of the facility as constructed exceed the contours permitted under the Construction Permit.

IN ALL OTHER RESPECTS, THE FACILITY IS CONSTRUCTED IN  
ACCORDANCE WITH THE TERMS OF THE CONSTRUCTION PERMIT.
