

RADIO MARKET ANALYSIS
IW LIMITED LIABILITY COMPANY
WLVG RADIO STATION
CENTER MORICHES, NEW YORK
September 2003

TECHNICAL STATEMENT

1. This technical statement and attached exhibits were prepared on behalf of IW Limited Liability Company ("IW"), proposed assignee of WLVG, Channel 241A, Center Moriches, New York. IW is also the licensee of station WRCN-FM, Channel 280A, Riverhead, New York. The 3.16 mV/m contours of WLVG and WRCN-FM overlap. This results in IW having interests in two FM stations in the same market. Exhibit #1 is a map depicting the subject stations.

2. A study, therefore, has been conducted to determine if ownership of these facilities complies with §73.3555 of the Commission's rules. The principal community contours of the subject stations establish the market boundary, hereinafter referred to as the "Radio Market". The study will determine the number of other commercial AM and FM stations that either have transmitter sites within the subject radio market, or have principal community contour overlap with the subject stations.

3. Exhibit #2 is a depiction of the stations within the WLVG/WRCN-FM Radio Market. There are eight commercial AM and FM stations depicted. Exhibit #3 is a tabulation of the stations in the Radio Market. The number of stations depicted falls in the fourteen or fewer

stations tier of §73.3555(a)(1)(iv) of the Commission's rules.¹ At the fourteen or fewer stations level, common ownership or control of up to five stations, with no more than three in the same service, is permissible (provided the number of commonly controlled stations does not exceed 50% of the stations in the subject market). Therefore, IW's interests in WLVG and WRCN-FM are in compliance with the rules. As such, the proposed assignment of WLVG to IW is in compliance with the Commission's multiple ownership rules, as detailed in §73.3555 of the rules.

4. The foregoing technical statement was prepared on behalf of IW Limited Liability Company by Graham Brock, Inc., its Technical Consultants. All information contained herein is true and accurate to the best of our belief and knowledge. All data relating to AM and FM facilities was extracted from the CDBS database. We assume no liability for errors or omissions in that database which may be adverse to the information contained herein.

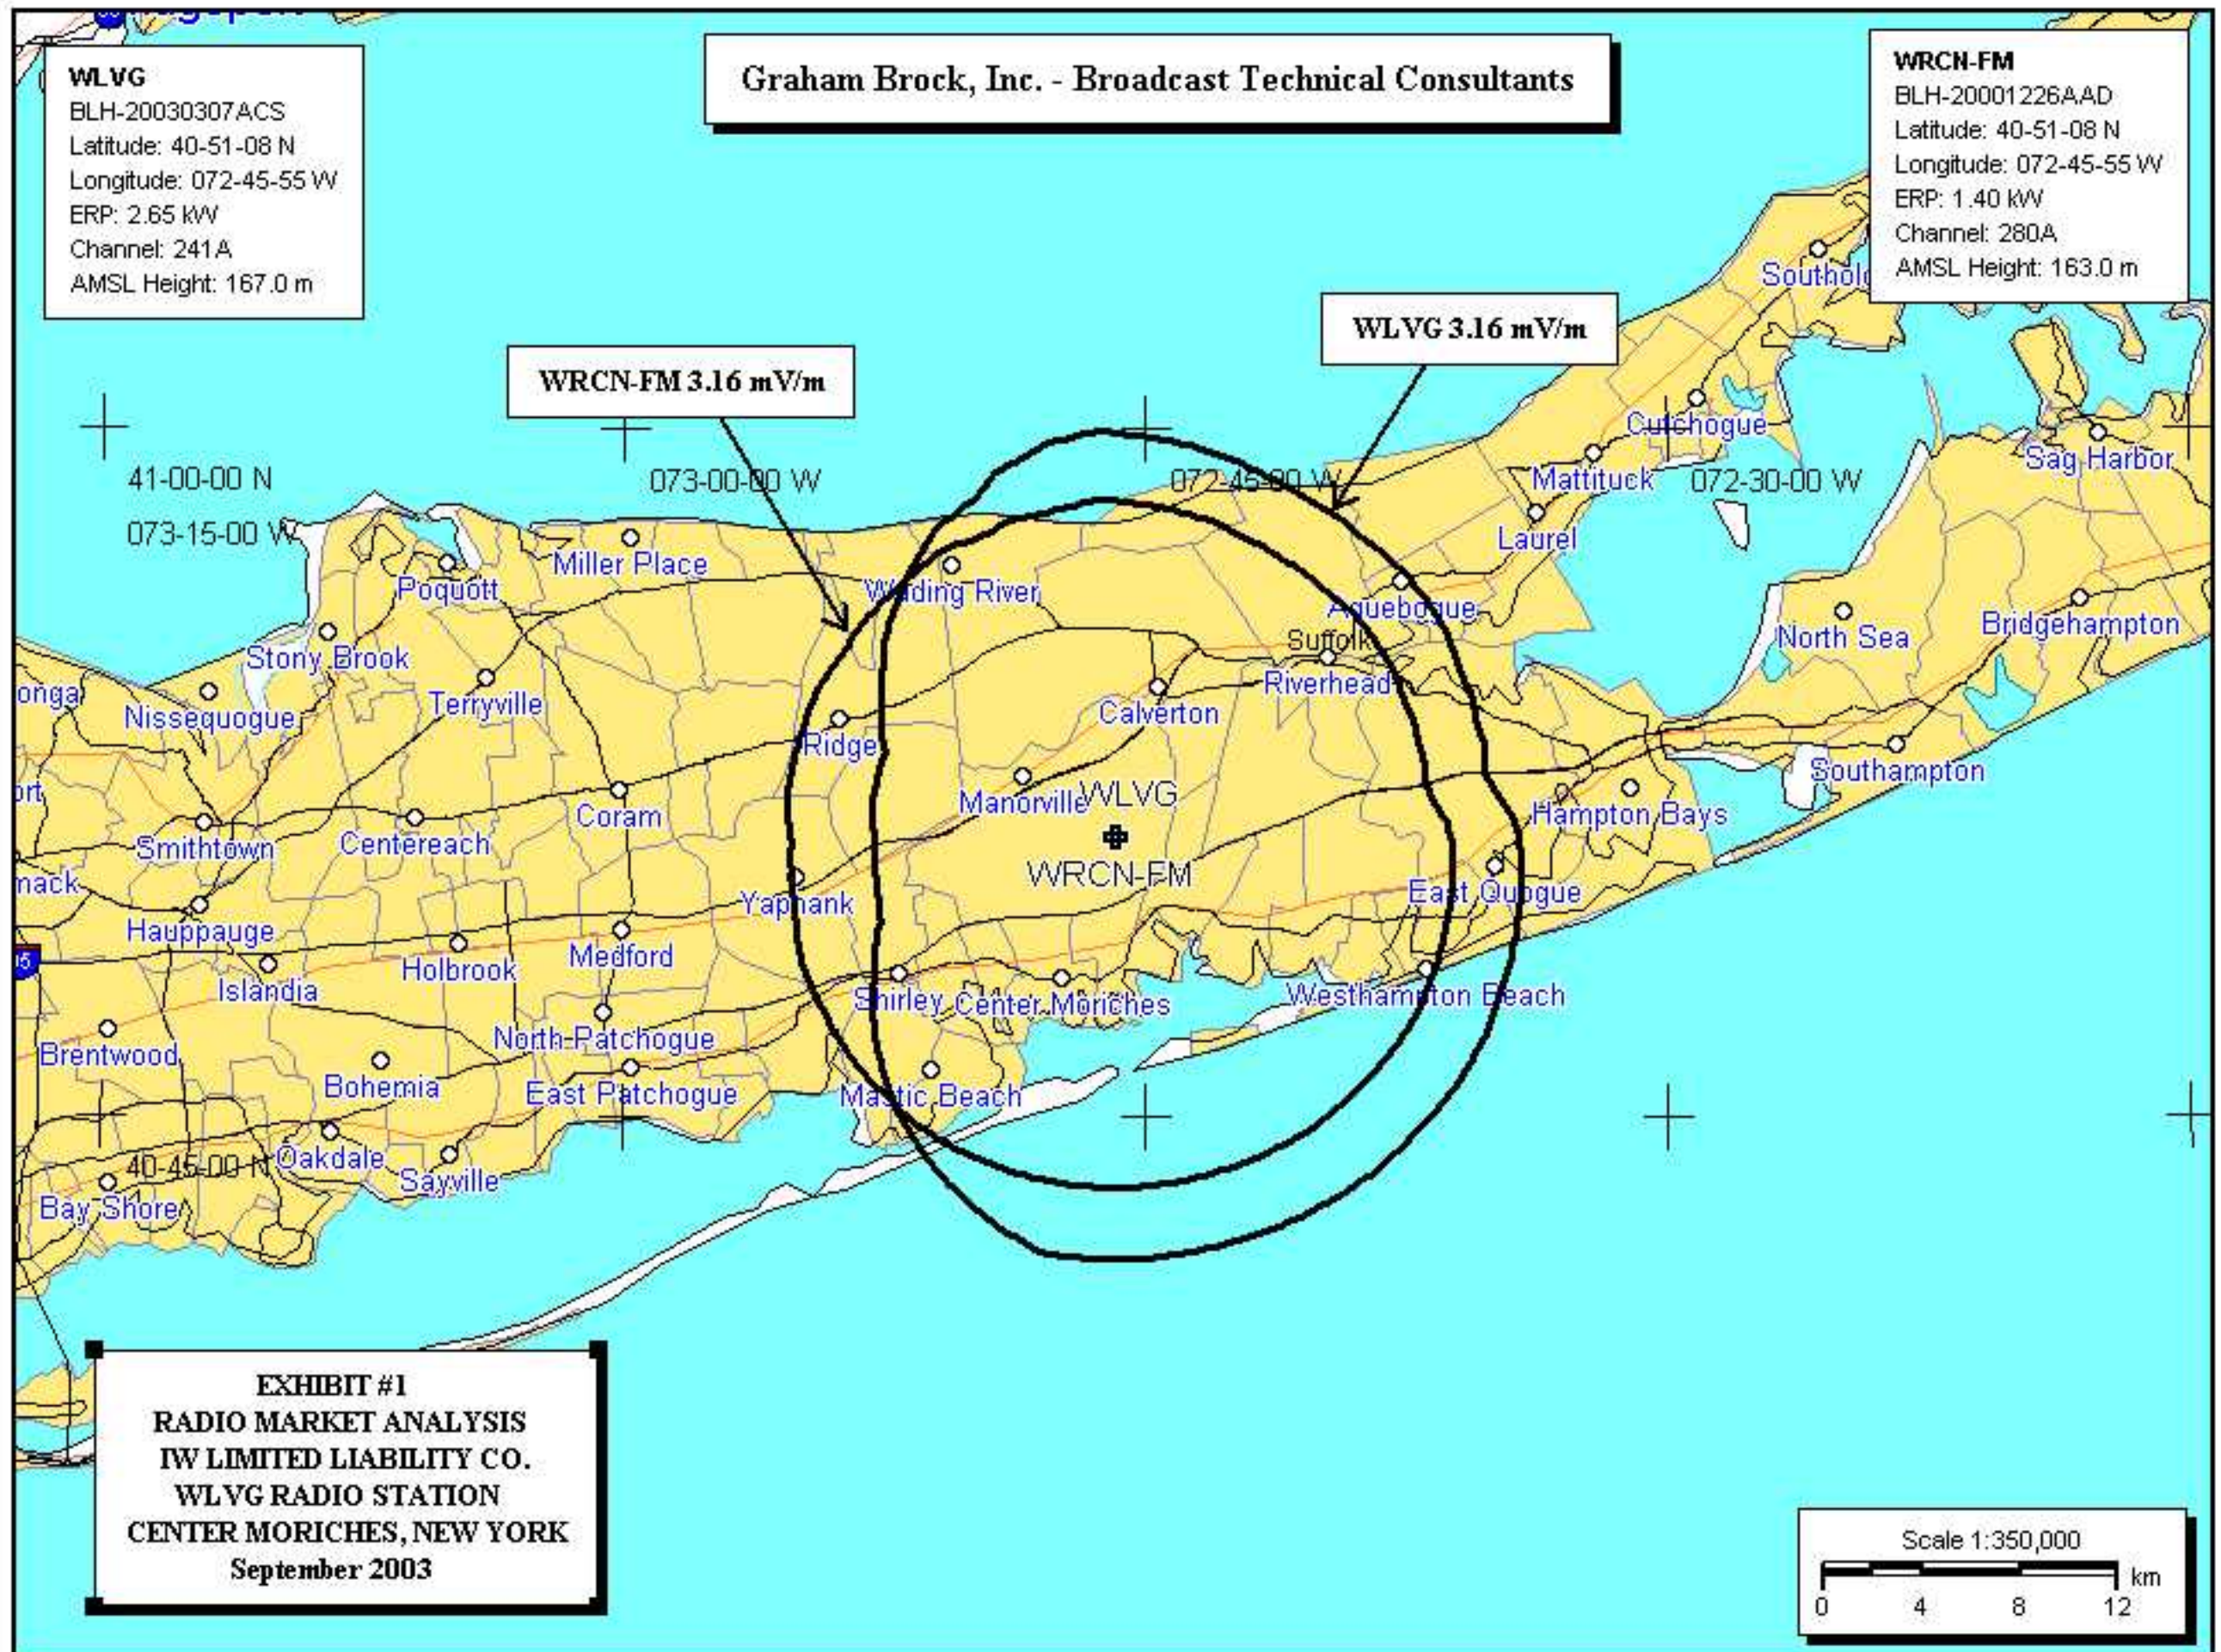

1) Although there are additional stations providing service to the Radio Market, they are not considered since the number of stations was ample to demonstrate compliance with the rules based on the number of stations proposed to be commonly owned.
