

ENGINEERING STATEMENT

Request for Special Temporary Authorization Early Digital Transition

prepared for

Sagamorehill Broadcasting of Alabama, LLC

WBMM-DT Tuskegee, AL

Facility ID 68427

Ch. 22 65 kW 341 m

Sagamorehill Broadcasting of Alabama, LLC (“Sagamorehill”) is the licensee of television station WBMM(TV), analog Channel 22 and digital Channel 24, Tuskegee, AL. This statement supports *Sagamorehill’s* request for Special Temporary Authority (“STA”) for an early transition to operate on its post-transition digital channel during the pre-transition period. This statement certifies compliance with coverage and interference criteria as specified in the Report and Order in the Third Periodic Review¹ for an early transition.

A construction permit (“CP” BPCDT-20080618ADG) authorizes WBMM-DT to operate its post-transition digital facility on Channel 22, the current WBMM analog channel. The proposed early transition STA facility will operate with the facilities as authorized in the CP.

A contour comparison map is supplied as **Figure 1**, showing that the coverage areas associated with the currently licensed analog Channel 22 and digital Channel 24 facilities will be nearly completely encompassed by the proposed digital Channel 22 operation. Population counts for the various WBMM TV/DT facilities are summarized below as determined using OET Bulletin 69²

¹*Third Periodic Review of the Commission’s Rules and Policies Affecting the Conversion to Digital Television*, MB Docket No. 07-91, FCC 07-228, released December 31, 2007.

²FCC Office of Engineering and Technology Bulletin number 69, *Longley-Rice Methodology for Evaluating TV Coverage and Interference*, February 6, 2004 (“OET-69”). A standard cell size of 2 km was employed. Comparisons of various results of this computer program (run on a Sun Sparc processor) to the Commission’s implementation of OET-69 show excellent correlation.

analysis. The proposed early transition STA facility will provide a service population exceeding those of the current analog and digital facilities.

Population Summary

WBMM TV/DT Facility	Interference-Free Population (2000 Census)
Licensed Analog Ch. 22 (BLCT-20020726ABV)	516,534
Pre-Transition Digital Ch. 24 (BLCDT-20060630ABG)	516,690
Proposed STA Digital Ch. 22	531,092

A detailed interference study per OET Bulletin 69 shows that the proposal complies with the Commission's 2% / 10% *de minimis* interference limits for operation during the transition, as demonstrated in **Table 1**. Thus, existing viewers will be served and impermissible interference will not be caused.

The proposed STA operation complies with the FCC's limits concerning human exposure to RF energy, as described in the application underlying BPCDT-20080618ADG.

The undersigned hereby certifies that the foregoing statement and associated attachments were prepared by him or under his direction, and that they are true and correct to the best of his knowledge and belief.
