RE: Antenna and tower As Built Certification for KTTS / KWND Tower site
4 miles North of Rogersville, Webster County, Missouri

Dear Mr. Jesse;

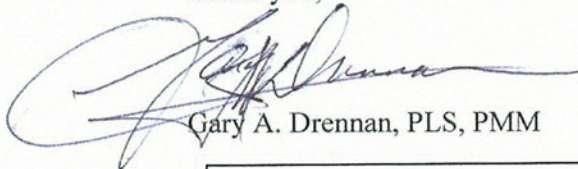

With this letter, I hereby certify that on December 21, 2009, I made an on site check of the above referenced antenna system.

My initial survey was prepared Spring of 2008 and subsequent survey of the Tower Site was prepared on December 04, 2009. Surveys were referenced to the North as determined by the Mr. Dennis Amsinger survey dated January 12, 2001. In addition, the Northwest Property corner is referenced on the Dept. of Natural Resources Corner Document No. 600-52918 prepared by Mr. Amsinger and dated March 25, 1994.

1. It was determined by the survey that the guy anchors radiating from the three-sided tower are installed at the following North Azimuths: 59, 179 and 299 Degrees to the nearest degree, (+/- one degree).
2. The new antenna is mounted on the Northwest Leg of the tower and faces in the direction of North Azimuth 329 Degrees, (+/- one degree). I have concluded that the antenna is oriented to face in the direction as per Plan No. 97579.

Attached is a sketch of the site. If there are any questions, feel free to contact me at the information provided above.

Thank you,

Gary A. Drennan, PLS, PMM
