

## EXHIBIT 5

By this application, Cox Radio, Inc. (“Cox”) seeks Commission consent to implement the change in community of license for WALR-FM from Greenville, Georgia to Palmetto, Georgia. This exhibit demonstrates that the proposed modification complies with the Commission’s local radio ownership rules.

### Local Radio Ownership Rule

Under Section 73.3555(a) (1) of the Commission’s rules, the FCC uses a tiered approach, as described below, to determine whether a combination of commonly-owned radio stations comply with the local radio ownership limits for any particular market.<sup>1</sup>

| Full-Power Commercial and NonCommercial Stations in the Market | Maximum Number of Stations in Which a Single Entity May Have an Attributable Interest                          | Maximum Number of Stations in the Same Service |
|--|--|--|
| 45 or More Stations  | 8 Radio Stations   | 5  |
| Between 30 and 44 Stations                                     | 7 Radio Stations   | 4  |
| Between 15 and 29 Stations                                     | 6 Radio Stations   | 4  |
| 14 or Fewer Stations   | 5 Radio Stations (provided that no entity may have an interest in more than 50% of the stations in the market) | 3  |

To determine the number of stations in a market, the Commission relies on one of three methodologies:

**1. Arbitron Methodology:** When more than one commonly owned radio station is licensed to a community within an Arbitron Metro Market, the FCC counts the number of commercial and noncommercial radio stations that are either “home” to the Arbitron market or are licensed to a community within that market (the “Arbitron Methodology”).<sup>2</sup>

**2. Contour Methodology:** For combinations that are licensed to communities outside an Arbitron market, the Commission defines the market as the area where the principal community contours for the commonly-owned stations overlap. To determine the number of stations in that market, the Commission counts all stations whose principal

<sup>1</sup> See 47 C.F.R. 73.3555(a) (1) (2006).

<sup>2</sup> See Biennial Review, 18 FCC Rcd at ¶280.

community contours overlap that of at least one of the commonly-owned stations. The Commission, however, excludes all stations whose transmitters are greater than 92 kilometers from the mutual overlap area and any commonly owned stations that are not included already in the market (the “Contour Methodology”).<sup>3</sup>

**3. Arbitron-Contour Hybrid Methodology:** The FCC requires an analysis under both the Arbitron Methodology and the Contour Methodology in two situations: (i) if at least one of the commonly-owned stations is “home” to an Arbitron market but it is licensed to a community outside that market or (ii) if a station is licensed to a community within an Arbitron market but its principal community contour overlaps that of another commonly-owned station that is not licensed to a community within any Arbitron market (the “Arbitron-Contour Hybrid Methodology”).<sup>4</sup>

### Atlanta, Georgia

WALR’s community of license, Palmetto, Georgia, is located inside the Atlanta Arbitron Metro market, and BIA classifies WALR-FM as “home” to the Atlanta Arbitron metro. Upon grant of the instant application, Cox will be the licensee of the following radio stations that are licensed to communities located within or otherwise “home” to the Atlanta, Georgia Arbitron Metro market:

| Station                      | Arbitron Market of Community of License | “Home” Arbitron Market | Licensee        |
|------------------------------|---|------------------------|-----------------|
| WALR-FM<br>Palmetto, GA      | Atlanta                                 | Atlanta                | Cox Radio, Inc. |
| WSB(AM),<br>Atlanta, GA      | Atlanta                                 | Atlanta                | Cox Radio, Inc. |
| WSB-FM,<br>Atlanta, GA       | Atlanta                                 | Atlanta                | Cox Radio, Inc. |
| WSBB(FM),<br>Doraville, GA   | Atlanta                                 | Atlanta                | Cox Radio, Inc. |
| WSRV(FM),<br>Gainesville, GA | None                                    | Atlanta                | Cox Radio, Inc. |

*Arbitron Methodology:* The Arbitron methodology is appropriate for this combination because, with the exception of WSRV(FM), all of the commonly owned radio stations are licensed to a community within the Atlanta Arbitron Metro Market. With respect to WSRV(FM), the principal community contour for WSRV(FM) does not overlap the proposed principal community contour for WALR-FM. The principal community contour for WALR-FM does not overlap any other commonly-owned station.

---

<sup>3</sup> See *id.* At ¶ 285.

<sup>4</sup> See *id.* At ¶ 286 n.606.

The BIA “FCC Geographic Market Definition for Atlanta, GA” identifies 87 full-power radio stations as “home” to or licensed within the Atlanta, Georgia market.<sup>5</sup> Therefore, at a minimum, Cox may hold an attributable interest in eight full-power, commercial station stations, of which five may be in the same service (AM or FM). As shown above, Cox owns five radio stations in the Atlanta Metro market (four FMs). As such, its ownership interests comply with respect to this market.

Accordingly, based on the foregoing, Cox respectfully submits that its proposed modification for WALR-FM fully complies with the Commission’s local radio ownership rules.
