Marlene H. Dortch, Secretary
Federal Communications Commission
445 12th Street SW
Washington, DC 20554

Engineer's Certification, in support of 302-FM license to cover BMPH-20071018ANM

Ms. Dortch:

In July of 2008, Javajava Radio was contracted to supervise the construction of transmission facilities of KZGM-FM, Cabool, Missouri. I personally coordinated the design of the facility between the antenna manufacturer, Howell Laboratories/Shively Antennas, and the tower manufacturer, ROhn Towers.

I also supervised the site survey, as well as installation of the directional antenna. All equipment designed to establish directivity of the antenna was installed as per manufacturer's specification.

My qualifications are a matter of record with the FCC, having constructed dozens of radio facilities, including at least seven directional FM stations, to include KNLN, KBPB, KTRI, KBIY, KNLQ, WCBW, KNLH and others. I have also established directional patterns for many AM stations, and conducted semi annual monitoring of these patterns. If you should have need of further information, please feel free to contact me via any of the methods listed above.

Respectfully submitted,

Richard A. "Rick" Jesse
