

Applicant BlueStone License Holdings, Inc. (“BlueStone”), licensee of KCFW-TV and permittee of KCFW-DT, both Kalispell, Montana (the “Station”), requests this modified construction permit pursuant to the Commission’s directive that a station forgoing further buildout of interim digital facilities file an application to modify its existing construction permit to match its partially-built pre-transition DTV facility. *See Third Periodic Review of the Commission’s Rules and Policies Affecting the Conversion to Digital Television*, Report and Order, MB Dkt No. 07-91, FCC 07-228, para. 46 (rel. Dec. 31, 2007). In the process of preparing the instant application, Applicant determined that the antenna/line gain/loss will result in a slightly greater effective radiated power (“ERP”) than authorized by the current Special Temporary Authorization (“STA”). Contemporaneously with the filing of the instant application, Applicant is filing an application for an STA in order to accommodate this minor discrepancy.

The Station intends to file separately an application for a construction permit in order to build out its final facilities on its post-transition channel.
