

KEY COMMUNICATIONS OF TEXAS  
W24CA - Miami, FL

EXHIBIT 6  
Form 346; Section III

The applicant is presently authorized, under File No. BPTTL-20011029AA0, to construct the reference facility at a site near Homestead, Florida. It is now proposed to relocate the station and to increase maximum effective radiated power to 150.0 kW. The attached map indicates the overlap between the authorized and proposed service areas.

A review of all available records indicates that interference might occur with regard to two NTSC and one LPTV authorizations. In this instance, the attached study shows that analyses per O.E.T. Bulletin No. 69 indicate that population loss to any of these would not exceed 0.5%.
