

Station WEEK-DT • DTV Channel 57 • Peoria, Illinois

Environmental Considerations

An Environmental Assessment is not required, as grant of this application would not be considered a major environmental action.

The proposed transmitting antenna will be a top-mounted antenna on an existing tower which is registered with the Commission. No increase in the overall height of the structure will occur.

The proposed transmitting facilities will comply with the FCC guidelines limiting human exposure to radio frequency energy. The maximum power density level at ground level, calculated in accordance with OET Bulletin No. 65 (August 1997), is 3.0% of the 0.49 mW/cm² public exposure guideline applying at UHF TV Channel 57. Accordingly, the proposed facility is categorically excluded by FCC Rules from having to consider the contributions of other stations at the site.
