RE: Antenna Alignment

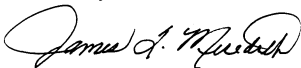

Atten: Tim Finley

Dear Mr. Finley:

Please be advised that my survey crew was at the tower in Manchester, Kentucky where the new directional FM antenna, Antenna Model PSIFM-3-DA was recently installed. We checked the antenna alignment and found it to be pointing at azimuth $327^{\circ}00'00''$, with $0^{\circ}00'00''$ being True North. This agreed with the information supplied to us by Propagation Systems, Inc.

Thanking you for the opportunity to be of service.

Sincerely,

JAMES Q. MEREDITH
KY. LIC. PROF. L.S. 1387
