On Tuesday, December 07, 2004, Bartlett & West Engineers, Inc. observed the positioning of the KJCV, Country Club, Missouri, antenna installation at the Wathena, Kansas, transmitter site. As of the Date of the field work, Bartlett & West Engineers, Inc. determined that the directional azimuth of the antenna is 138 degrees with respect to True North (WGS 84). The margin of error of the observation is better than a plus or minus 0.50 degrees.
