

TECHNICAL STATEMENT
WFCB(FM), FACILITY ID 52042
CLEAR CHANNEL BROADCASTING LICENSES, INC.
RADIO MULTIPLE OWNERSHIP ANALYSIS -- 11/12/2003

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. ("CCBL"), a licensee subsidiary of Clear Channel Communications, Inc. CCBL proposes to modify the facilities of WFCB(FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

Call Sign	Facility_id	City	State
WCOL-FM	25037	COLUMBUS	OH
WNCI	47741	COLUMBUS	OH
WFJX	64716	HILLIARD	OH
WTVN	11269	COLUMBUS	OH
WCOL	25038	COLUMBUS	OH
WLW	29733	CINCINNATI	OH
WFCB-cp	52042	CHILLICOTHE	OH

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules¹.

CCBL does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the proposed facility of WFCB(FM).

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form one "radio market" for analysis under the Commission's rules.

Radio Market "1" is defined by the mutually overlapping principal community contours of WFCB(FM) (as proposed in the accompanying Form 301 application), WCOL(AM), WLW(AM), WTVN(AM), WCOL-FM, and WNCI(FM). The

¹ See 47 C.F.R. § 73.3555.

predicted principal community contours of these stations (3 FM, 3 AM) are shown in *Figure 1*.

Radio Market "2" is defined by the mutually overlapping principal community contours of WFCB(FM) (as proposed in the accompanying Form 301 application), WCOL(AM), WTVN(AM), WCOL-FM, WNCI(FM), and WFJX(FM). The predicted principal community contours of these stations (2 FM, 4 AM) are shown in *Figure 1*.

Count of Stations in Defined Markets

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours that overlap or intersect the principal community contours that define the radio market, plus the subject commonly owned or controlled stations.

In Radio Market "1 and 2" studied herein, there are over 45 radio stations, including the subject co-owned stations, that overlap or intersect with the defined "radio market." *Table 1* is the tabulation of the radio stations identified in the market and *Figure 2* is a map representing those stations contours. For simplicity of analysis only those stations that overlap or intersect station WTVN, which is common to both markets, are listed.

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 45 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Troy G. Langham
FCC Engineering Specialist
Clear Channel Broadcasting Licenses, Inc.
