

**TECHNICAL EXHIBIT FOR
MINOR MODIFICATION TO CONSTRUCTION PERMIT
KTDS-LD, FACILITY ID 182250
TED'S PLACE, CO
FCC FILE NUMBER BMPDTL-20100916ACY
JAMES R. MCDONALD, JR.**

Introduction. The instant application is for modified construction at the same transmitter location as the underlying CP. Anticipated construction in the cold weather months in the Colorado mountains will be difficult given the December expiration date of the construction permit and the lead time for some of the equipment. Accordingly, construction is planned using locally available materials and labor. The same community will be served and the proposed service contour is entirely within the bounds of that of the underlying construction permit.

Interference analysis. The standard Longley-Rice study was used to determine that, with the exception of a single facility, the proposal is compliant with all applicable portions of §74.793. The single facility to which the proposal causes excess interference is K48CG, Loveland, CO, FCC File number BDISDTL-20111206BCT. However, the 6.00% interference shown from the within proposal is now less than that which existed from the already granted KTDS-LD construction permit at the time the K48CG application was filed. An exhibit is attached which demonstrates that when BDISDTL-20111206BCT was filed, the applicant knowingly filed in the face of incoming interference from KTDS-LD's construction permit BMPDTL-20100916ACY which amounted to 6.14%. Accordingly, the instant application represents a reduction of interference faced by K48CG's displacement construction permit. A full printout of both FLR studies is attached following to demonstrate this situation.

Environmental analysis: antenna installation is proposed on an existing tower on a privately owned, secure site; no tower construction is contemplated. NIER of the within proposal is less than 5% of the upper limit for this service; no EA is thus required.

It is respectfully requested that the within application be processed for grant promptly so that construction can begin as soon as possible considering the change of seasons, which soon will make construction more difficult.

**TECHNICAL EXHIBIT APPENDIX PART ONE
INTERFERENCE RECEIVED FROM KTDS-LD CONSTRUCTION PERMIT BY BDISDTL-
20111206BCT WHEN FILED = 6.14%**

34A CO DENVER	BLCDDT	20091209ACA	LIC
33A CO TED	USERRECORD01		APP

The following station failed the de minimis interference criteria.

33D CO TED USERRECORD01
ERP 1.00 kW HAAT 147.0 m RCAMSL 2064.0 m
Antenna cdb 00000000020067

Due to interference to the following station and scenario: 12

33D CO LOVELAND BDISDTL 20111206BCT
ERP 15.00 kW HAAT 75.0 m RCAMSL 1558.0 m
Antenna CDB 00000000107641

Percent new interference from proposal: 4.8031 to BDISDTL 20111206BCT

Worst case new IX 6.0015% Scenario 1
