

EXHIBIT 13

Waiver Request of Section 74.1204

Raymond, MS W214BE

Minor Site Change 10 Watts ERP

Calvary Chapel of Twin Falls, Inc. 4/2010

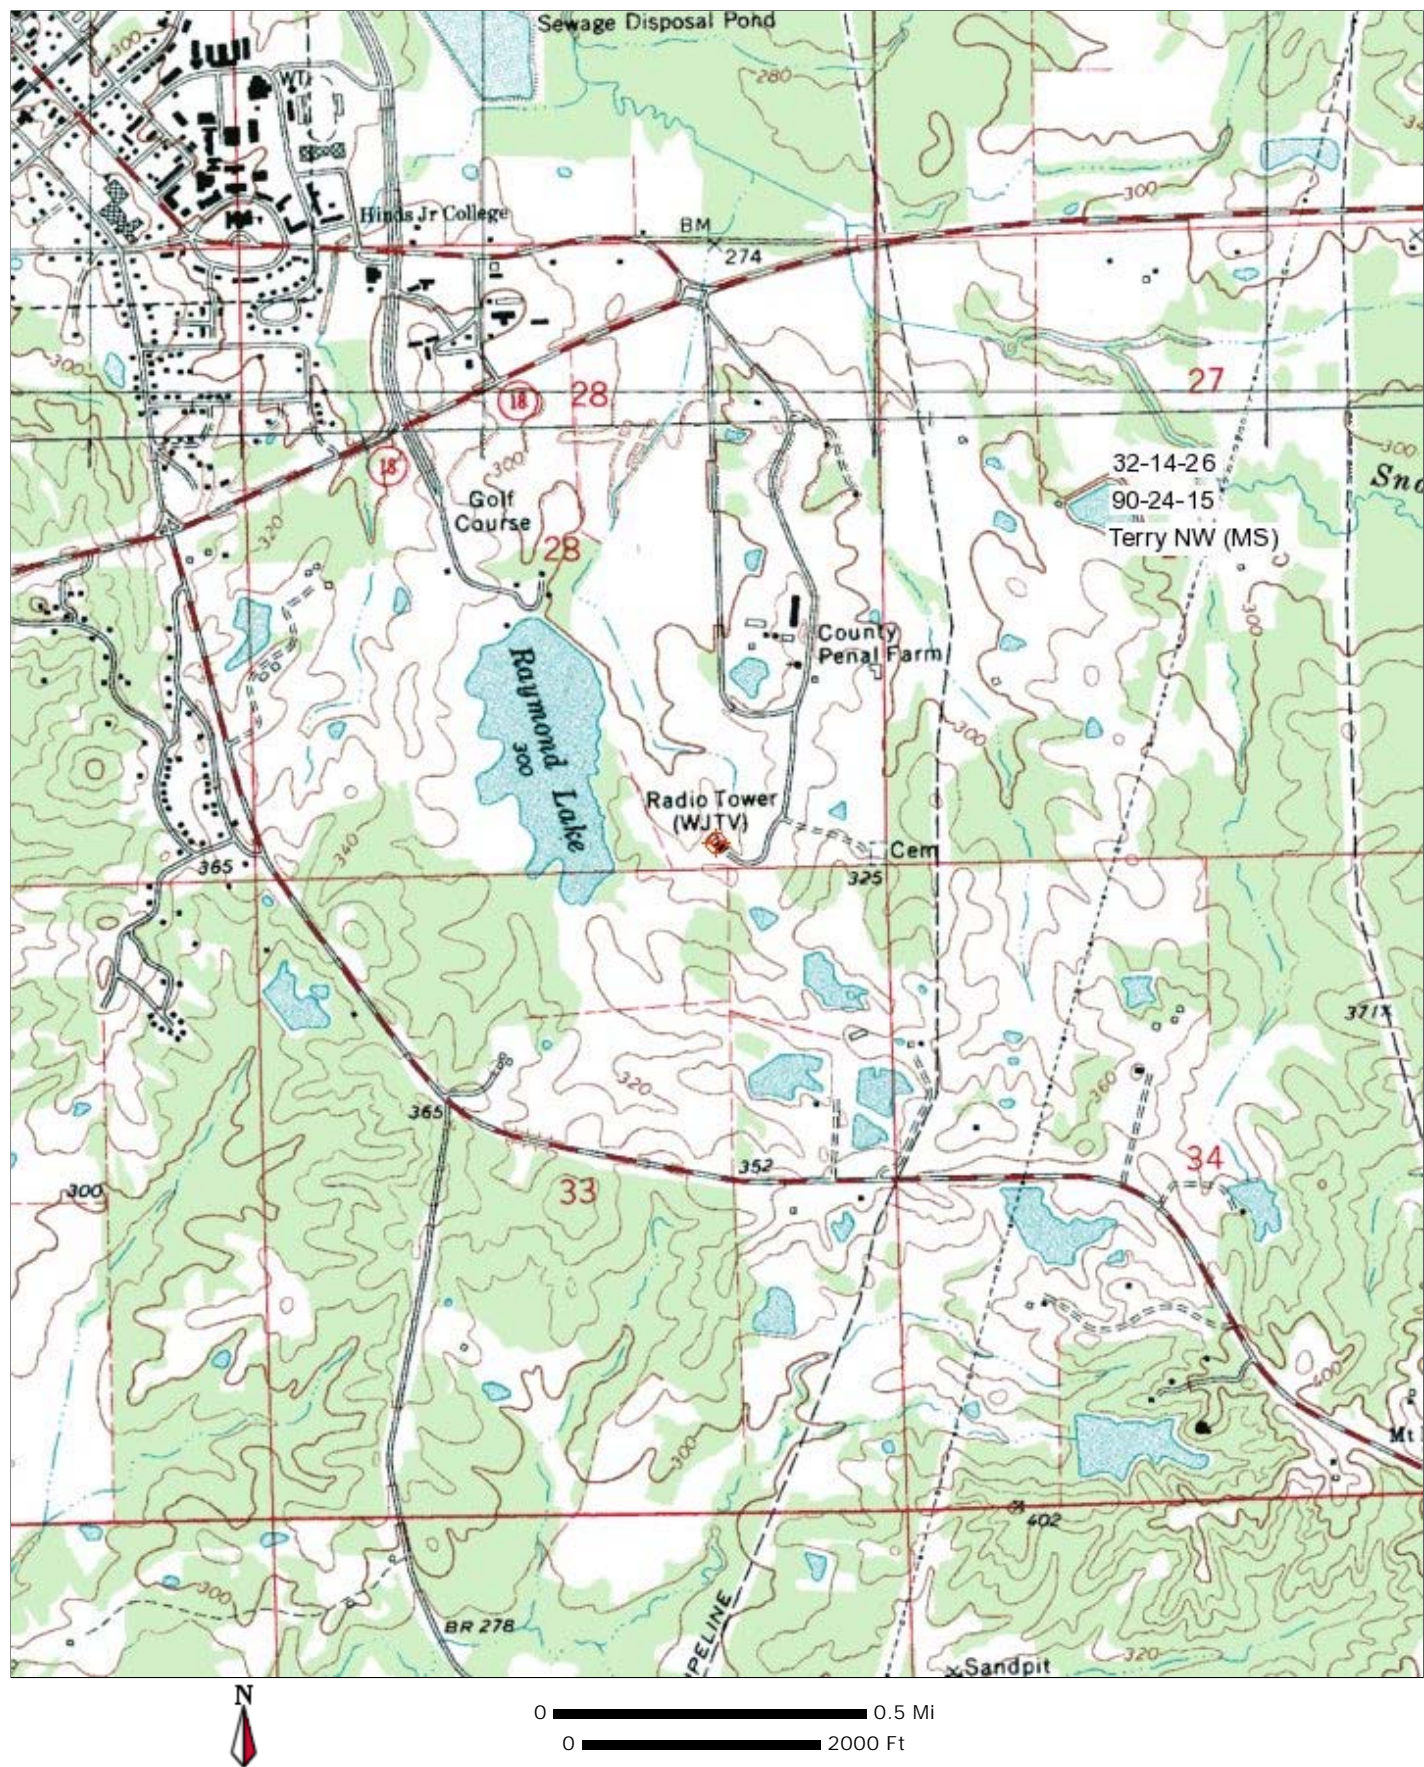

The proposed site is contained entirely inside the service contour of third-adjacent station WMPR Jackson, MS and third-adjacent station WMPN Jackson, MS

WMPR

The proposed site is contained entirely inside the service contour of second-adjacent station WMPR, Channel 211, Class C1, 100kW, Jackson, MS. The level of least arriving protected F(50,50) signal at the proposed transmitter site is 74.5-dBu. Using the Undesired-to-Desired method, the interfering contour with respect to WMPR is 114.5-dBu (free-space contour method employed). The interfering signal would, in the worst case at the maximum radial, extend 43 meters from the center of radiation, which is proposed at 125 meters AGL. This interference contour does not touch the ground. This tower is located in a very sparsely populated existing communications site. Attached is a section of the USGS Terry NW Quadrangle which shows the tower is not located in population. Because there are no residences, businesses or major roads that are located within the interfering contour, Calvary Chapel of Twin Falls, Inc. respectfully requests a waiver of the FM translator contour overlap regulations with respect to second-adjacent channel station WMPR.

WMPN

The proposed site is contained entirely inside the service contour of second-adjacent station WMPN, Channel 217, Class C, 45kW, Jackson, MS. The level of least arriving protected F(50,50) signal at the proposed transmitter site is 106.7-dBu. Using the Undesired-to-Desired method, the interfering contour is 146.7-dBu (free-space contour method employed). The interfering signal would, in the worst case at the maximum radial, extend 1 meter from the center of radiation, which is proposed at 125 meters AGL. This interference contour does not touch the ground. This tower is located in a very sparsely populated existing communications site. Attached is a section of the USGS Terry NW Quadrangle which shows the tower is not located in population. Because there are no residences, businesses or major roads that are located within the interfering contour, Calvary Chapel of Twin Falls, Inc. respectfully requests a waiver of the FM translator contour overlap regulations with respect to second-adjacent channel station WMPN.
