EXHIBIT C

MULTIPLE OWNERSHIP REVIEW

1. Cumulus Licensing LLC has increased the effective radiated power of KBAT, Monahans, Texas and is required to show that the increase does not cause a violation of the ownership rules (§73.3555). KBAT is not located within a metro county in any Arbitron/BIA market. However, KBAT is considered “home” to the Odessa-Midland, Texas market. Cumulus is also the licensee of KGEE, Channel 247C1, Pecos, Texas; KMND, 1510 kHz, Midland, Texas; KNFM, Channel 222C, Midland, Texas; KZBT, Channel 227C1, Midland, Texas; KRIL, 1470 kHz, Odessa, Texas; and KODM, Channel 250C1, Odessa, Texas. KMND, KNFM, KZBT, KRIL and KODM are all licensed to communities within the Odessa-Midland, Texas Arbitron/BIA Market (Market #188). KGEE is considered “home” to the Odessa-Midland, Texas market. As a result, a hybrid ownership analysis is needed with respect to rated markets and a contour overlap review for stations not licensed to metro counties within a rated market.

ARBITRON/BIA MARKET REVIEW

2. As shown on Exhibit C1, there are twenty-eight AM and FM (commercial and non-commercial) stations listed in the Odessa-Midland, Texas Market. Cumulus will remain in

control of five FM stations and two AM stations in the market. The number of stations indicated falls in the fifteen to twenty-nine stations tier of §73.3555(a)(1)(iii) of the Commission's rules. At this level, common ownership or control of up to six stations, with no more than four in the same service, is permissible. This combination of stations owned by Cumulus existed prior to the change in §73.3555 of the rules and, as such, is grandfathered.¹ Further, pursuant to Note 4, §73.3555, since the KBAT power increase will not change the concentration of stations in the subject Arbitron market, it is believed that KBAT remains grandfathered under the Commission's ownership rules for rated markets.

REVISED CONTOUR OVERLAP ANALYSIS

3. As KBAT is licensed to a non-metro county a contour overlap analysis has also been conducted for ownership compliance review. A map depicting the city grade contours of the seven above referenced stations is attached as Exhibit C2. Based on the contour overlap, two distinct markets exist. Market #1 consists of FM stations KBAT, KNFM, KODM and KZBT, and AM stations KRIL and KMND. Market #2 consists of FM stations KBAT and KGEE.

4. A study has been conducted to verify that the ownership of these facilities, in two separate markets, is in compliance with the Commission's multiple ownership rules. Since KBAT is a subject station in each market, its contour will be used to determine the number of other stations providing service to the market. Then the relevant subject stations in each market will be added to determine the total number of stations in the respective market. As such, the

1) Under the former contour overlap analysis rules, Cumulus was in compliance with the ownership rules.

KBAT contour will be considered the "Radio Market Boundary". No stations with transmitters located more than 92.0 kilometers from the boundary of the common overlap of subject stations will be considered. Further, no other facility controlled by Cumulus will be considered as a market contributor, unless it is a subject station in the pertinent radio market under study.

5. Exhibit C3 is a depiction of the other AM and FM stations (commercial and non-commercial) providing service to the KBAT Radio Market. A total of thirteen stations are shown. Exhibit C4 is a tabulation of the stations in Radio Market #1, which shows a total of nineteen stations, including the six subject stations.² The number of stations depicted falls in the fifteen to twenty-nine stations tier of 73.3555(a)(1)(iii) of the Commission's rules. At this level, common ownership or control of up to six stations with no more than four in the same service is permissible. Therefore, Radio Market #1 is in compliance with the rules.

6. Exhibit C5 is a tabulation of the stations in Radio Market #2, which shows a total of fifteen stations, including the two subject stations.³ The number of stations depicted falls in the fifteen to twenty-nine stations tier of 73.3555(a)(1)(iii) of the Commission's rules. At this level, common ownership or control of up to six stations with no more than four in the same service is permissible. Therefore, Radio Market #2 is in compliance with the rules.

7. Based on the above, the ownership for rated markets remains unchanged as a result of this power increase for station KBAT (the combination remains grandfathered) and under the

2) Although there are additional stations providing service to the Radio Market, they are not considered since the number of stations was ample to demonstrate compliance with the rules based on the number of stations proposed to be commonly owned

3) See Footnote 2, supra.

revised contour overlap rules, KBAT is also in compliance with the ownership rules. Therefore, it is believed that the increase of effective radiated power for KBAT does not cause a violation of the multiple ownership rules and is, therefore, in compliance with §73.1690(c)(7) of the rules.
